SAMSUNG SMART TV

10 Smart interaction[2]

From the Smart Hub[6] to the amazing S Recommendation[1] with Voice Interaction[3], your Samsung Smart TV is the most advanced TV Samsung has yet produced.

20 Smart content

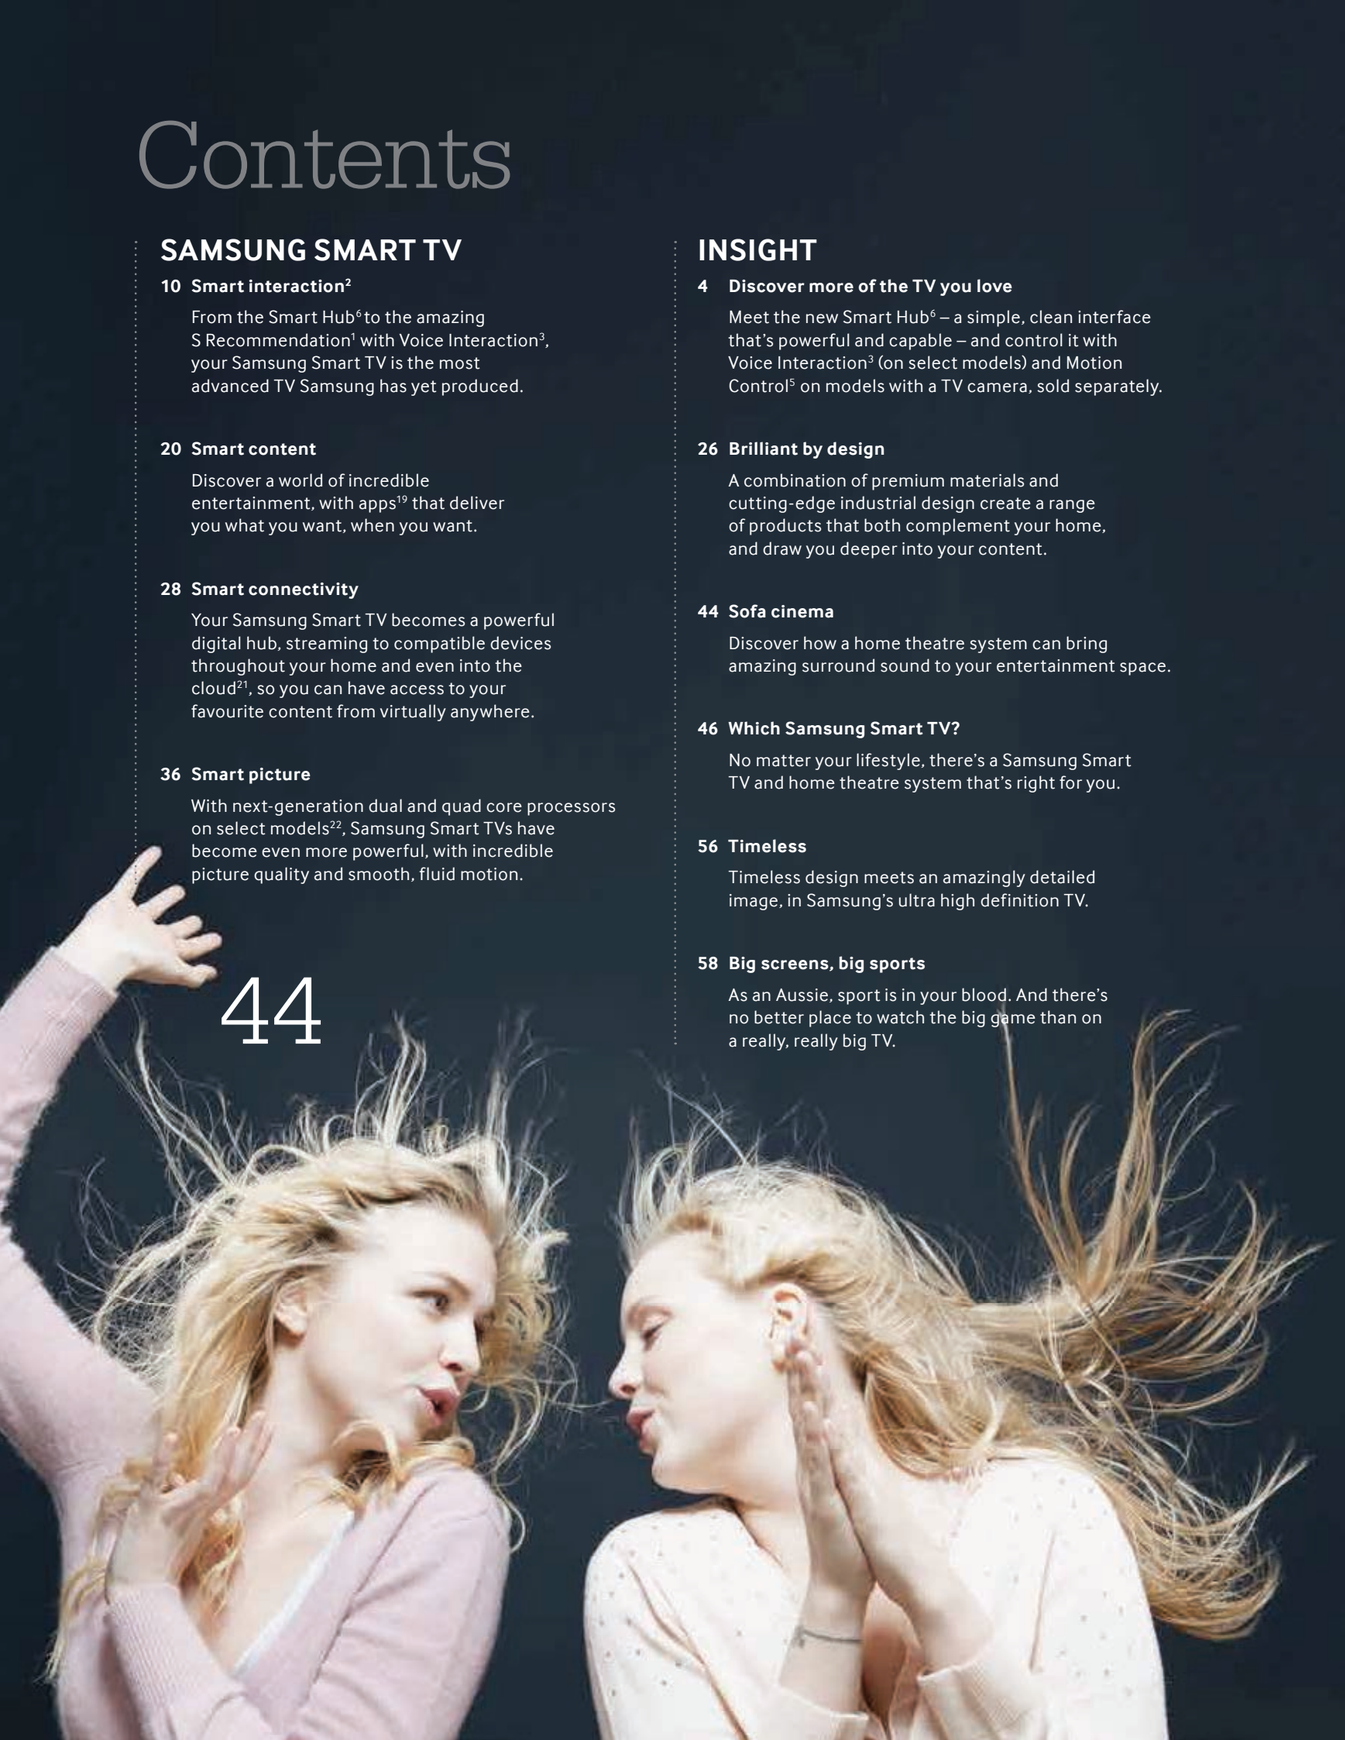
Discover a world of incredible entertainment, with apps[19] that deliver you what you want, when you want.

28 Smart connectivity

Your Samsung Smart TV becomes a powerful digital hub, streaming to compatible devices throughout your home and even into the cloud[21], so you can have access to your favourite content from virtually anywhere.

36 Smart picture

With next-generation dual and quad core processors on select models[22], Samsung Smart TVs have become even more powerful, with incredible picture quality and smooth, fluid motion.



INSIGHT

4 Discover more of the TV you love

Meet the new Smart Hub[6] – a simple, clean interface that's powerful and capable – and control it with Voice Interaction[3] (on select models) and Motion Control[5] on models with a TV camera, sold separately.

26 Brilliant by design

A combination of premium materials and cutting-edge industrial design create a range of products that both complement your home, and draw you deeper into your content.

44 Sofa cinema

Discover how a home theatre system can bring amazing surround sound to your entertainment space.

46 Which Samsung Smart TV?

No matter your lifestyle, there's a Samsung Smart TV and home theatre system that's right for you.

56 Timeless

Timeless design meets an amazingly detailed image, in Samsung's ultra high definition TV.

58 Big screens, big sports

As an Aussie, sport is in your blood. And there's no better place to watch the big game than on a really, really big TV.

PREMIUM

With an elegant combination of high-grade materials, world-class design, and incredible power and features, these products represent the pinnacle of Samsung's home entertainment technology.

The wait is over. The most anticipated advance in television technology has arrived.

curved brilliance

Organic light emitting diode (OLED) television is a new dawn for entertainment. With lifelike colour reproduction, incredible detail, and a unique and natural curve to the display surface, moving images look amazing.

Traditional LED televisions require a lighting system behind the actual pixels that make up the image. With OLED display technology, each individual sub-pixel produces its own light, in a specific, precise colour. Colour is bright, accurate and incredibly intense, while contrast levels are extraordinary.

And that means every image you see on the TV appears as its creator intended. Every shadow, every nuance – virtually nothing is lost.

The most remarkable thing about OLED is that because there's no need for a separate lighting system, engineers and designers are free to make the television everything it can be. Because the human eye is curved, it's only natural for our televisions to be curved too, and with OLED, this ideal is now made possible.

The display technology is new, but the heart of the OLED TV brings with it all the innovations you'll find on other Samsung Smart TVs. Voice[3] and Motion Control[5], S Recommendation[1] for finding movies and TV shows you may like, great content apps and wireless media sharing from the Smart Hub[6], plus exceptional image processing – all this combines with the future of television to bring you the future of entertainment.

OLED unleashes television's full potential. And it needs to be seen to be believed.

KA55S9AC

The clever Multi View[27] feature allows two people to enjoy different sources on the same amazing screen at once. Watch a sports broadcast while she enjoys a Blu-ray movie, and experience incredible sound and picture from both through Samsung active Multi View 3D glasses with built-in speakers.

Not all features are available on all Samsung products. Certain disclaimers and restrictions apply. Please see page 82 for further explanatory materials, disclaimers and restrictions.

Discover More of the TV YOU LOVE

It's the TV you love, but made better in ways you never dreamed, where next-generation intelligence and technology meets stunning design.

A TV SHOULD be more than a device, more than just another piece of technology. For most of us, the TV is at the core of our home, a window onto the wider world. From the prosaic; keeping up-to-date with the nightly news, to the personal; viewing family photos via a wireless link to a compatible smartphone.

And so much more in between. The power and versatility of a 2013 Samsung Smart TV is something that, just a few years ago, would seem unbelievable. But it's here now.

Everything centres around the Smart Hub[6] interface; this is TV tailored to you. Download apps[19] to get access to even more personalised content. Access your most important social media networks. Browse the web[20]. Watch catch-up TV, or get movies on-demand.

It's all about you and the TV – you can even control it using normal speech. Just ask what's on, and Samsung Smart TV can show a program guide. Ask if anything "good" is on, and it can make suggestions based on your viewing preferences, find shows with your favourite actor, and serve up the genres you ask it for. If you purchase a TV camera, Motion Control[5] is there too, so you can change channels with a flipping motion, scroll through web pages, or use two hands to zoom or rotate still images on the screen.

All this functionality doesn't come at the expense of quality. LED[15] panel and processor technology create images so crisp, so detailed, they have to be seen to be believed. And it's all wrapped up in stunning, unique design, so your TV can be the beautiful centrepiece of any living room.

IQ boost

A clear simple interface for mining all the content riches of your Samsung Smart TV, the Smart Hub[6] is your starting point for great features like S Recommendation[1], apps[19], Skype®[12], web browsing[20], catch-up TV, video on-demand and more. Smart Hub is available in Samsung LED[15] models from the F5500 Series up to the F8000, as well as the plasma F8500 and F5500 Series.

You'll also find Smart Hub features – apps, web browsing and the photos, videos and music you've collected via AllShare (Contents Sharing)[8] – on home theatre systems from the HT-F5500 up to the HT-F9750W, and in Blu-ray players and recorders from the BD-F6500 and above.

Samsung Smart TV is…

Content

The Smart Hub[6] takes you way beyond the limits of broadcast TV with catch-up TV, movies, sports and news apps[19]. Access social networking sites, browse the web, enjoy your personal media collection over a home network, and take advantage of S Recommendation[1] for personalised suggestions for the content you love.

Interaction

Voice Interaction[3] lets you talk in everyday English to a select Samsung Smart TV and have it search for favourite content. Ask if anything "good" is on, and S Recommendation[1] can suggest TV shows based on your viewing tastes, or you can operate the TV using spoken commands and hand gestures with Voice and Motion Control[5].

Connectivity

Your TV takes advantage of incredible connectivity to take your entertainment way beyond the living room. Use AllShare (Content Sharing)[8] to wirelessly access your content virtually anywhere, whether it's in the next room, or the next town. Store your recorded programs in the cloud[21], then watch them half a world away.

Picture

For great TV, the image is everything. Select Samsung LEDs[15] combine powerful quad core (LED F8000, plasma F8500) or dual core processors (LED F5500 and above, plasma F5500) with Micro-Dimming[24] technology to create incredibly sharp, detailed pictures, while an Ultra Clear Panel on select models helps absorb ambient light to reduce reflections and let you see the whole image.

Design

Great design complements your lifestyle, but also makes a statement. Samsung's new design portfolio combines mathematical simplicity with the elegance of nature, and with premium metal finishes and ultra-thin bezels, pictures seem to just float in space, bringing you even closer into the action.

Not all features are available on all Samsung products. Certain disclaimers and restrictions apply. Please see page 80 for further explanatory materials, disclaimers and restrictions.

: Samsung Smart TV can learn what you like

An uncompromising fusion of design, intelligence and technology creates an amazing lounge room centrepiece.

smooth & sophisticated

The flagship LED[15] F8000 Series truly is an expression of Samsung's next-generation technology, intelligence and design. Incredibly slim, yet packed with amazing features. Powered by a super-fast and super-smart quad core processor, this luxury television uses Micro Dimming Ultimate to display sharp, bright images in astonishingly vivid detail.

Voice Interaction[3] allows you to communicate with your Samsung Smart TV in plain English, so you can to search for and discover content using S Recommendation[1]. This tracks your viewing preferences to intelligently suggest live TV programming you will enjoy, so you don't have to waste time channel surfing.

So Samsung Smart TV can learn what you like, and with Motion Control[5] it can even respond to your commands without you having to reach for the remote control.

Use simple hand movements to flip, scroll, zoom and select entertainment from the television's next-generation Smart Hub[6], including digital TV channels and customised recommendations, apps[19] for catch-up TV, movie rentals, web browsing and social networking.

Clean and powerful, the Smart Hub interface makes everything easy to find – even the media you store on compatible devices.

This comes courtesy of the F8000's built-in Wi-Fi and AllShare[8,9] features, which let you wirelessly play photos, videos and music from compatible devices you keep around the house to the TV's big screen.

Store your content in the cloud[21] and you can even enjoy it on compatible mobile devices you use away from home – your favourites can go with you, virtually wherever you are.

Seamless viewing

LED F8000

The elegant 'Arc' stand eliminates the central plinth that characterises Samsung's conventional television design, and allows the image to seemingly float in space. Elegant lines are unbroken even by the retractable camera, which pops up only when needed, and folds away when not.

Not all features are available on all Samsung products. Certain disclaimers and restrictions apply. Please see page 82 for further explanatory materials, disclaimers and restrictions.

Smart TV…
Child's play

Your Samsung Smart TV is full of an almost unbelievable amount of content, and for 2013 Samsung has redesigned the core of the TV – the Smart Hub[6]. It's easy and intuitive, with a straightforward multi-panel interface that not only gets you what you want when you want it, but can even help you discover new content, thanks to S Recommendation[1].

With S Recommendation, a Samsung Smart TV can serve up a selection of TV shows it thinks you may like. Suggestions are based on previous viewing habits and, over time, the system learns and evolves with your preferences, helping to ensure you can always find what you like, as well as discover new favourites.

On select models, S Recommendation works with Voice Interaction[3], so you can speak directly to the TV to ask it for a suggestion, or instruct it to find specific programs, genres or actors. Just speak naturally into the Smart Touch Remote, and the TV will respond. "Anything to watch?" Your Smart TV knows.

You can also be more direct, using Voice Control[3] to carry out key TV operations without any button presses. Just talk into the remote to increase the volume and change channels, or to perform other basic commands.

Can't put your finger on the remote right now? Don't get up: just use Motion Control[5] to flip through panels of the Smart Hub, select the content you want, or zoom in on photos (requires built-in camera or camera accessory, sold separately). Simple!

THE PANELS

PLAY VIDEO

On TV

Access live TV channels, see what's coming up with the Guide, and choose recommended programs via S Recommendation[1].

Apps

Download apps[19] for more video on-demand services such as Foxtel Play[14], stream music with apps like Samsung Music Hub, and discover games, news, sports, weather and so much more.

Social TV

Log into Facebook and Twitter to stay in touch with friends, or even comment on live TV as it goes to air[19]. With a built-in camera or camera accessory, make video calls with Skype®[12].

Photos, Video & Music

Play digital content, whether from an attached USB hard drive[11], or over the home network. Plus send content to compatible mobile devices and the cloud[21].

A SMART TV THAT GETS SMARTER EVERY YEAR

Like the idea of being able to upgrade your 2013 Smart TV with new features every year? Samsung's innovative Evolution Kit[7] (sold separately from 2014) attaches to the back of LED[15] F8000 and F7100, and plasma F8500 models to keep you up to date with new features and services. It's an easy way for you to enjoy the benefits of Samsung Smart TV enhancements as they become available each year.

Not all features are available on all Samsung products. Certain disclaimers and restrictions apply. Please see page 82 for further explanatory materials, disclaimers and restrictions.

Tailored TV

S Recommendation[1] gives you more content you want, even before you know you want it!

ON TV PANEL

Tune into free-to-air programs from the On TV Panel, and find TV shows you like with S Recommendation[1]. The panel displays an image of what's on the live TV channel you're currently tuned into, and next to it a grid of what's live on other channels, with the row below showing programs that are coming up next.

When you first turn on your Samsung Smart TV, the viewing options displayed will be based on popularity, but as your Samsung Smart TV learns your viewing tastes, S Recommendation takes charge and presents the kinds of programs you like best.

You can choose content from the On TV Panel using a remote control, or use Voice Interaction[3] (on select models) to ask your TV to select programs to watch.

SPEAK... AND BE ENTERTAINED

With Voice Interaction , you can ask Smart TV questions like "Anything to watch?" or "Please find me an action movie" and have S Recommendation display a list of live TV programs that match your viewing habits. Smart TV will ask which item you'd like, and by answering "Number 3" into the microphone on the Smart Touch Remote, the TV will change channels to show that content.

You can use Motion Control[5] to help S Recommendation find programs you like too. Give a "thumbs up" gesture to a show (requires built-in camera or camera accessory, sold separately) and S Recommendation will remember it to suggest more of the same.

And because everyone has unique tastes, select Samsung Smart TV models can use Face Recognition[4] to identify viewers and adjust S Recommendation results accordingly (requires built-in camera or camera accessory, sold separately).

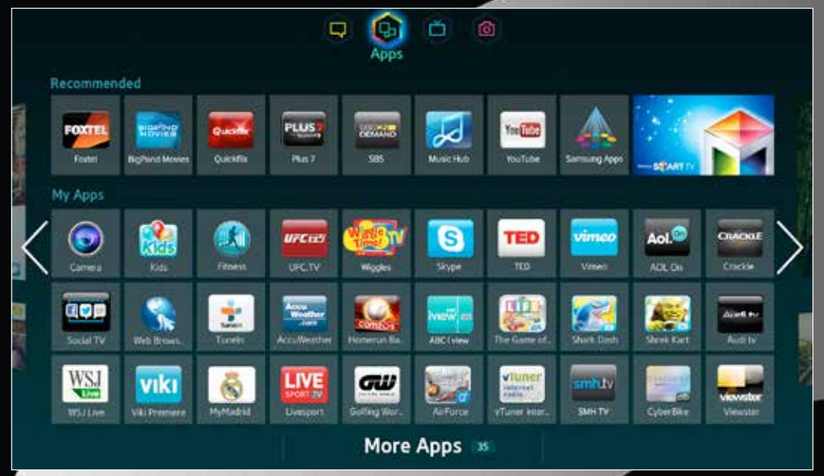
Your remote is listening

Speak into the microphone on the sleek Smart Touch Remote to use Voice Interaction and Voice Control[3] on select models. The remote also includes a touchscreen for more precise control of the Smart Hub[6], and has a rock solid connection to the TV via Bluetooth® on select models – no pointing and hoping!

Not all features are available on all Samsung products. Certain disclaimers and restrictions apply. Please see page 82 for further explanatory materials, disclaimers and restrictions.

Mad about apps

Apps[19]: they're the clever little programs that make your TV so much more than just a TV.



PLAY VIDEO

APPS PANEL

The Apps Panel is the section of the Smart Hub[6] where you can expand your TV's capabilities by choosing from a huge and growing range of programs that add extra content and features to your entertainment experience.

The variety of apps[19] is impressive: there's movies on-demand with BigPond and Quickflix; catch-up TV via the Yahoo 7 PLUS7 app; apps to help you with your fitness; music streaming with Samsung Music Hub... the list goes on and on... and on! You'll even find a web browser, a special app that lets you visit all your favourite websites, from the comfort of your couch.

Because the Smart Hub is a personal experience, you can customise the Apps Panel to put your favourite apps within easy reach, and receive new apps recommended to you based on the apps you use most.

HANDS-OFF CONTROL

You can surf the web and manage the Apps Panel using your Smart TV's Voice and Motion Control[3,5] features (on select models).

To perform a web search, just speak your search phrase into the Smart Touch Remote's microphone. With your hand, use a grabbing gesture at the screen to select an app to open, or flip your hand to go to the next Smart Hub panel or scroll a web page.

It's effortless and intuitive, thanks to the power of Smart Interaction[2]!

With Motion Control[5], you can flip between the panels of the Smart Hub[6] with your hand, and use a grabbing gesutre to select the app[19] you want to open.

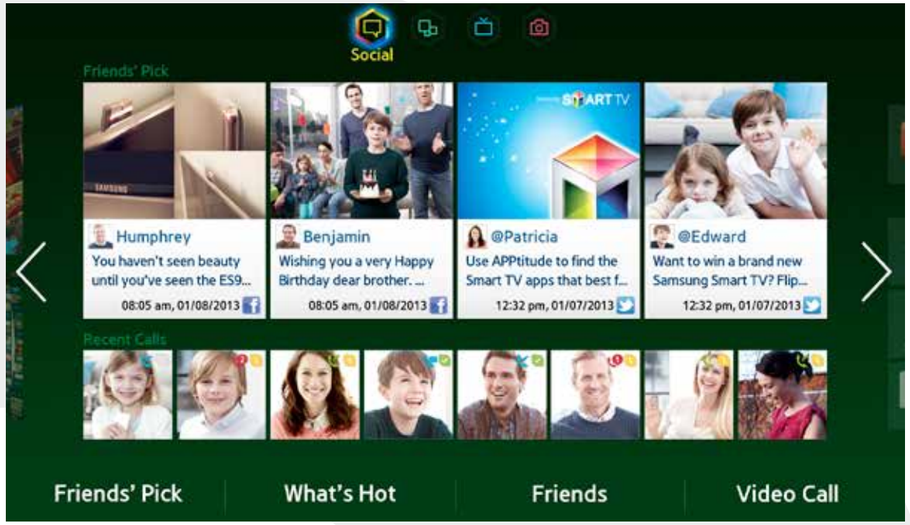
EXPERIENCE SMART TV AT A STORE NEAR YOU

Surf the web, keep up to date with news and weather, play games or stream movies and TV shows, such as *Mad Men* (pictured; Foxtel Play[14] app), all from the Smart Hub's Apps Panel .

Not all features are available on all Samsung products. Certain disclaimers and restrictions apply. Please see page 82 for further explanatory materials, disclaimers and restrictions.

Keep in touch

Watching TV doesn't mean missing out on staying connected. You can reach friends and family through social media, and video-calling[12], right from the couch!



SOCIAL PANEL

On the Smart Hub[6]'s Social Panel, the world's most popular social networks – Facebook and Twitter – are integrated into a simple, clean interface. New updates appear in the middle of the panel, and when you "Like" a TV program using Facebook, your friends can see that update on your Facebook news feed.

For one-on-one conversations, Skype®, [12] lets you make video calls for free across the internet. Recent calls appear in a bar across the bottom of the Social Panel, or you can see a list of friends by choosing "Friends" at the bottom of the screen.

SOCIAL CONTROL

Your social networks aren't limited to the Social Panel – they can be an integrated part of your everyday TV experience. With Motion Control[5] for instance, you can "Like" the current TV show by giving the TV the thumbs-up.

Maybe your best mate sees that "Like" appear on your Facebook wall, and he calls you on Skype right away. Your TV alerts you to the call, and if you accept it, a video image of your mate fills the TV screen, ready for you both to discuss the show's finer plot points. (Skype and Motion Control require a Smart TV with built-in camera or TV camera accessory, sold separately.)

Here's looking at you

A TV that you can watch is great, but a TV that can see you right back can add so much more to the experience. With an optional TV camera accessory, you can bring one-hand Motion Control[5], Skype® [12] video calls and Face Recognition[4] to a compatible Samsung Smart TV without a built-in camera.

Keys to interaction

You can update Facebook and Twitter using the Smart Touch Remote and an onscreen keyboard, but real social media butterflies will appreciate a hardware keyboard. The Bluetooth® Keyboard (sold separately) pairs with your Bluetooth-enabled TV[23] and compatible Android™ devices to bring fast, flexible input. It even includes a touchpad for scrolling web pages[20] and selecting apps[19].

Not all features are available on all Samsung products. Certain disclaimers and restrictions apply. Please see page 82 for further explanatory materials, disclaimers and restrictions.

Your content, your way

Take command of your media collection, and play it here, there and virtually everywhere... even in the cloud[21]!

PHOTOS, VIDEOS & MUSIC PANEL

Taking advantage of a home broadband network, the Photos, Videos & Music Panel uses amazing wireless AllShare (Content Sharing)[8] technology to collect the personal media you keep on compatible devices around the home and display it to the TV.

So, those photos on your Galaxy S3? View them as a slideshow on the big screen using AllShare (Mirroring)[9]. Movies or home videos on the PC in the study? Just stream them to the telly in the living room. And that music library on your Samsung Tab 10.1 tablet? Play it to the speakers of a Samsung home entertainment system or Smart TV.

And when you want to take your entertainment files with you outside home – but not the portable devices they're stored on – AllShare (Content Sharing)[8] works with cloud[21] services like Dropbox® and SugarSync to make them available wherever there's a Wi-Fi or 3G connection. You and your favourites can always be together!

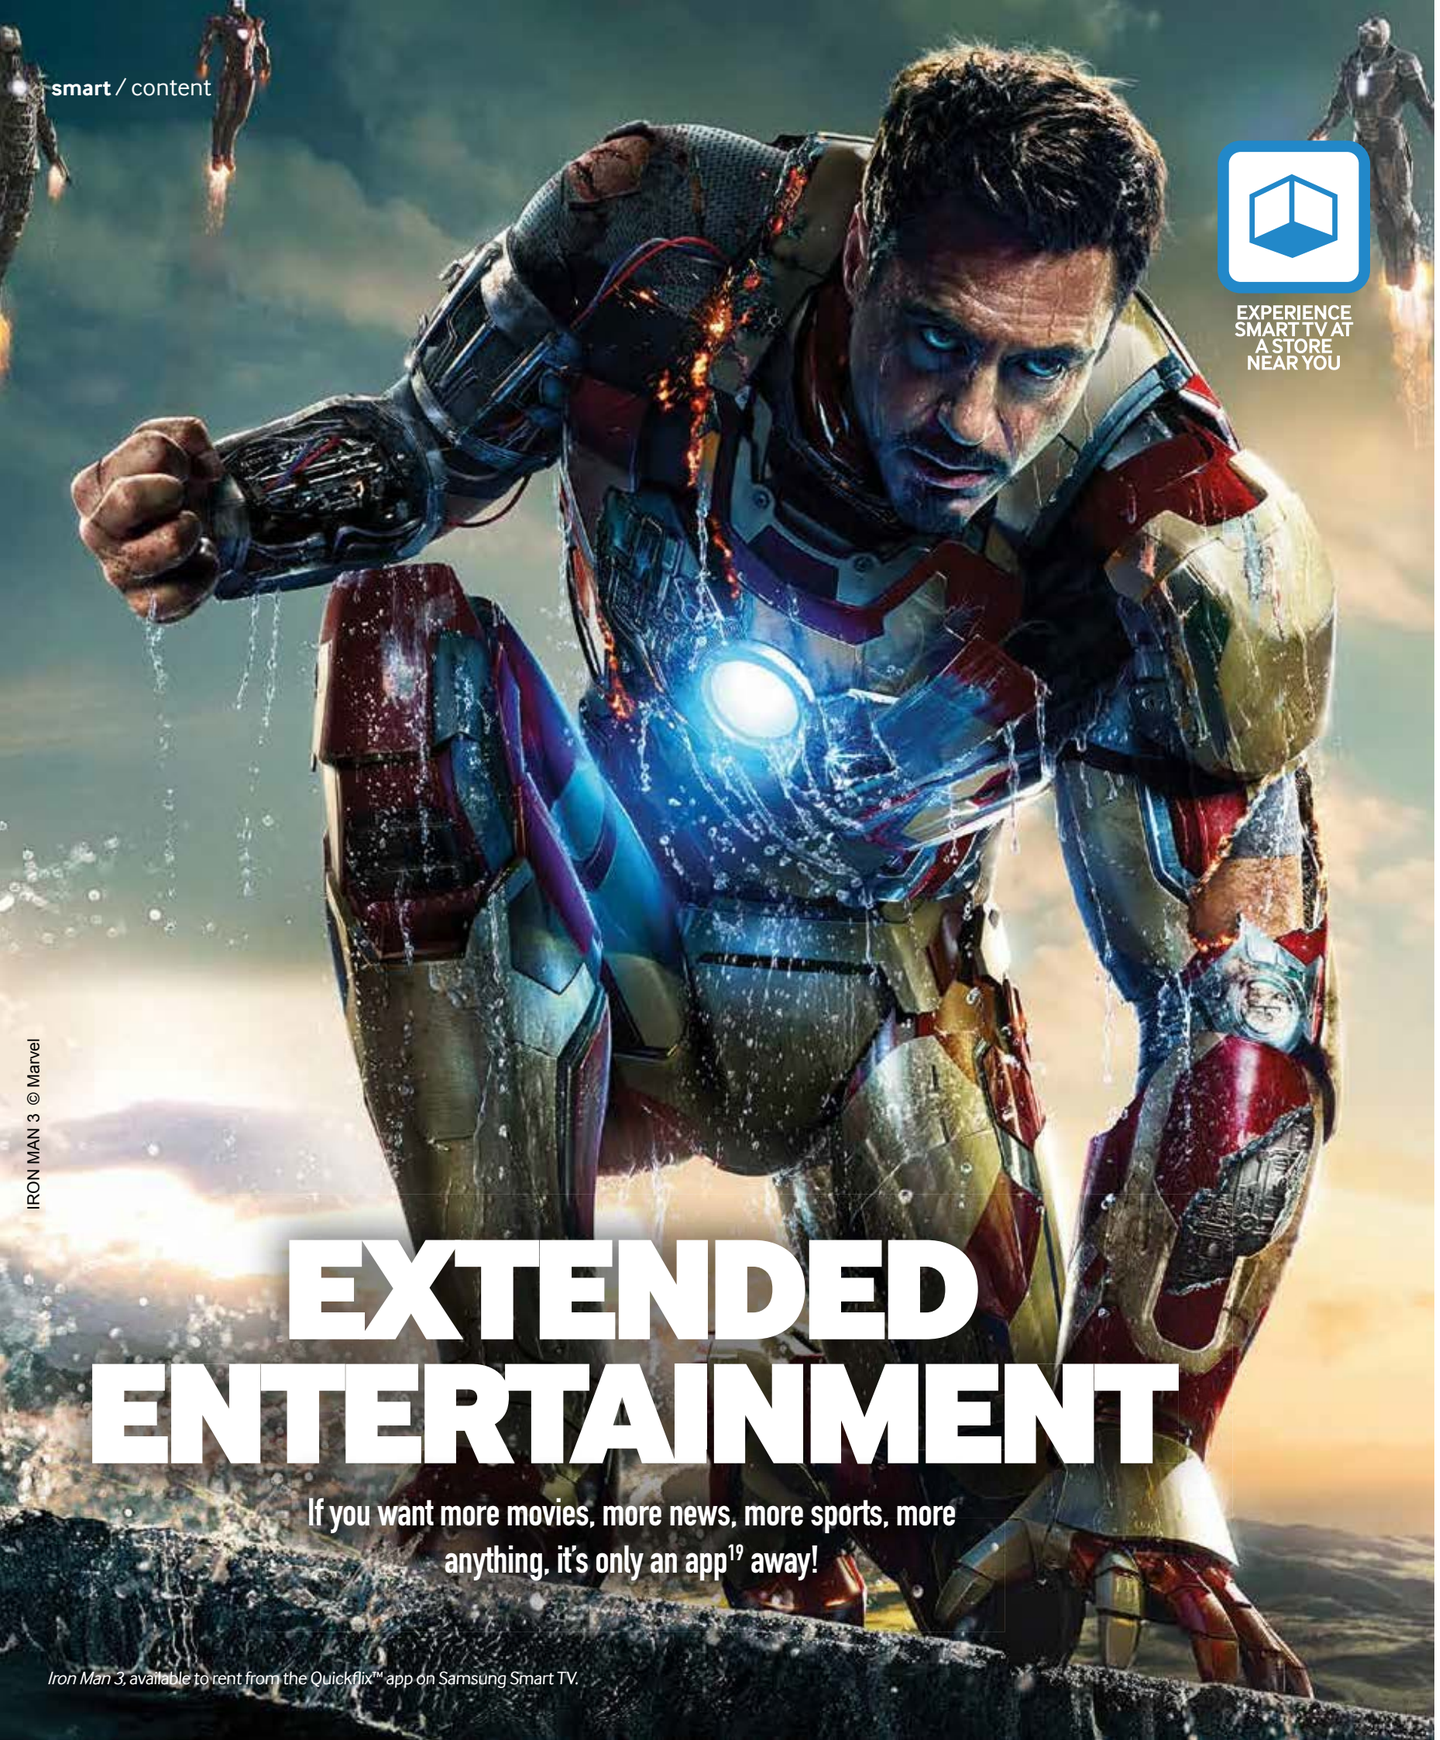
EVERYWHERE ENTERTAINMENT

With your Smart Touch Remote, you can use the Photos, Videos & Music Panel and AllShare to control playback of content on different devices throughout the home, even if you're in a different room.

And back in front of the TV, you can use Motion Control[5] gestures (inbuilt camera or accessory TV camera required, sold separately) to view photos: pull-to-zoom, or use your hand to flip through images in a slideshow.

With Motion Control[5] on LED F8000 and plasma F8500 models you can use two-handed gestures to zoom and rotate photos on the screen.

Not all features are available on all Samsung products. Certain disclaimers and restrictions apply. Please see page 82 for further explanatory materials, disclaimers and restrictions.



EXPERIENCE SMART TV AT A STORE NEAR YOU

IRON MAN 3 © Marvel

EXTENDED ENTERTAINMENT

If you want more movies, more news, more sports, more anything, it's only an app[19] away!

Iron Man 3, available to rent from the Quickflix™ app on Samsung Smart TV.

With a Samsung Smart TV paired to your home internet connection, you can search, rent and buy from a range of video-on-demand providers via a handy new location on the Smart Hub – the Movies & TV Shows Panel. It works with S Recommendation too, so you can receive personalised viewing suggestions based on what you've watched before.

There's more to watch and enjoy when you can download great apps[19] from the Smart Hub Apps Panel – perfect for when the free-to-air schedule is looking a little bare.

The Quickflix™ app allows you to choose from hundreds of blockbuster movies and popular TV shows – including the best from HBO and the BBC. Take advantage of the free 14-day trial before signing up for a monthly all-you-can watch subscription, or simply rent or buy titles whenever you like.

Get Foxtel direct to your Samsung Smart TV with the Foxtel Play[14] app. Its Entertainment, Drama, Documentaries, Kids, Sports and Movies and Premium Drama packages provide access to over 40 live Pay TV channels, and with no need for a set-top box there's no installation fee. Plus, you can subscribe on a month-by-month basis, change your channel packages, or cancel whenever you like.

There's a whole range of extra movie and entertainment apps too, including Wiggle Time TV for the kids, the amazing Explore 3D app for 3D[18] content and, of course, YouTube.

Together, the Apps and Movies & TV Shows Panels open up a huge world of entertainment, and it's all easy to access from the Smart Hub.

POWERFUL TO THE CORE

Samsung Smart TVs are powered by a dual core (LED F5500 and above, plasma F5500) or quad core processor (LED F8000, plasma F8500), which means there's real power behind Samsung Smart TV's passion! With a mighty processor under the hood, a Samsung Smart TV can download apps[19] quickly and provide fast results for your content and web searches. You'll also find dual core processors in Blu-ray players and recorders (BD-F6500 and above) and home theatre systems (HT-F5500 and above) with Smart Hub[6] AV capability.

MOVIES AND ENTERTAINMENT BUILT-IN

PLAY VIDEO

1/ MOVIES & TV SHOWS PANEL

Search for movies and TV shows to rent or purchase from the new Movies & TV Shows Panel. Choose what you want from Samsung Video and Quickflix™, with more providers to come, and receive suggestions based on your viewing preferences.

2/ QUICKFLIX™

Stream hundreds of classic and new-release movies in high definition, with a single monthly charge for all you can watch[6]!

3/ FOXTEL PLAY

Get the movie and entertainment channels you know and love, without the contract, the installation fee or the clutter of connecting an extra box[14].

4/ WIGGLE TIME TV[19]

Subscribe to a package of kids' favourite TV shows, including *The Wiggles*, *Dorothy the Dinosaur*, *Baby Antonio's Circus* and more.

5/ EXPLORE 3D

Find amazing 3D movies, sport, music videos and more with this 3D[18] video on-demand service (requires 3D-enabled TV).

6/ YOUTUBE

The internet's favourite video service, up on the big screen. Millions of videos, from quirky clips to feature-length indie documentaries and so much more.

7/ KIDS

A variety of content just for kids, from movies to games and educational content, all with parental access control.

Not all features are available on all Samsung products. Certain disclaimers and restrictions apply. Please see page 8 for further explanatory materials, disclaimers and restrictions.

AN APP[19] FOR EVERY GAME

1/ FOXTEL SPORTS

Fifteen sports channels for $30 a month from the Foxtel Play[14] app. Get the latest results and watch matches, without an installation fee or extra box.

PLAY VIDEO

2/ AFL ANALYSER AND RUGBY ANALYSER

Goals, penalties, player statistics and more – review all aspects of a game using simple pause, play, forward, rewind and slo-mo controls.

3/ ESPN.3

The home of live international sports, including baseball, basketball, football, wrestling and ultimate fighting, and so much more.

4/ MY MADRID

The ultimate app for true fans of Real Madrid. Get exclusive content and locker room access to the club, as well as live results, stats, and player profiles. Be part of the 'Madridstas' community.

5/ FITNESS

Work out in the comfort your own living room. Track your progress and manage your workout history via this video on-demand service.

A WORLD OF GREAT MUSIC[19]

1/ SAMSUNG MUSIC HUB

Stream hundreds of thousands of tracks, and download songs for offline listening when you subscribe. Includes compatibility with your Samsung Galaxy S3 and S4 smartphone!

PLAY VIDEO

2/ BIGPOND MUSIC

Switch on to quality programmed music clips, celebrity interviews, music news and live perfomrances all day, every day.

There's nothing like watching your favourite team win big on the big screen for pure excitement, and with a range of sports apps[19] available on your Samsung Smart TV, you'll never miss a match. From football to ultimate fighting to golf, there's something for every serious sports fan – and not just local games either. There's a whole world of sports waiting for you.

It's a world that offers 15 great sport channels from Foxtel Play[14], including Speed, Eurosport, ESPN and ESPN2, Fuel TV and FOX SPORTS 1, 2 and 3, with great live sport from key codes and seasonal sports moments from AFL, NFL, Rugby, A League and cricket.

ESPN.3 is there too, the online home for the best live international sports, such as Major League Baseball, NBA, UEFA Champions League, NCAA football, basketball and heaps more. Or check out Livesports TV and BigPond's AFL Analyser, and drop into weigh-ins and bouts at the UFC TV app.

Or perhaps you want to kick back with some smooth tunes. There are apps for streaming music services like Samsung Music Hub too. Forget buying and downloading albums: a single subscription gives you hundreds of thousands of tracks at your fingertips, ready to stream in near-CD quality.

Sports and music can take your Samsung Smart TV experience to the next level, with a virtually endless supply of great content, to suit every preference.

EXPERIENCE SMART TV AT A STORE NEAR YOU

SPORTING CHANCE

All the teams, all the games, all the music when and where you want it.

Watch a world of international sports on ESPN via the Foxtel Play[14] app.

Not all features are available on all Samsung products. Certain disclaimers and restrictions apply. Please see page 82 for further explanatory materials, disclaimers and restrictions.

Catch up on episodes of *The X Factor* via the PLUS 7 app[19].

EXPERIENCE SMART TV AT A STORE NEAR YOU

DON'T MISS A THING

Get the full app experience with catch-up TV, news, documentaries, lifestyle, web browsing and more.

Your Samsung Smart TV does much more than play movies and music on-demand. The wealth of content you can access via the Smart Hub[6] is huge: catch-up TV, documentaries, news, lifestyle, social networking, web browsing, video calls with Skype® [12] (inbuilt camera or camera accessory required, sold separately), games, weather, stocks... the list goes on!

Get your content when you want it, not just in primetime, with the PLUS7 app from Yahoo 7. Catch up on episodes of your favourite shows, including *The X Factor* and *Home & Away*, exclusive to Samsung Smart TV. There are also catch-up TV apps from ABC (via iview), SBS On Demand, and other providers like TED, SMH.tv and for an international perspective, Euronews.

So don't sit back and wait for broadcast TV to feed you information on a schedule. With apps, your Smart Hub becomes a one-stop shop for all the information you need, and with web browsing, social networking and Skype®.[12], it also keeps you in contact with the people who are most important to you[20]. Plus for dense, rich information, there are weather and stock market apps, when you need to get everything at a single glance.

SMARTER COMPONENTS

Samsung's Smart Hub[6] with apps (excluding Foxtel Play[14]) is available on home theatre systems (HT-F5500 and up) and Blu-ray players (BD-F6500 and above). These products also feature a web browser for surfing favourite sites and watching web[20] video on the big screen.

THE APPS[19] THAT MATTER

PLAY VIDEO

1/ PLUS7

Catch-up TV and more from Yahoo 7, including your favourite shows like *The X Factor* and *Home & Away*. Pause, play and rewind at will.

2/ ABC IVIEW

A selection of the ABC's most popular shows and movies, available on-demand, with content from the BBC and the latest season of Doctor Who.

3/ SBS ON DEMAND

A world of international and foreign-language content, from comedy to documentary and award-winning movies, all on-demand.

4/ SMH.TV

Video on-demand with a current affairs and news focus. Award-winning journalism and in-depth documentaries, from Australia and around the world.

5/ TED

The Technology Entertainment and Design conferences run around the globe, and give you an on-demand window into the future of science, technology and innovation.

6/ OVATION CHANNEL

Australia's first dedicated arts and entertainment channel, embracing performance, drama, music, and visual arts.

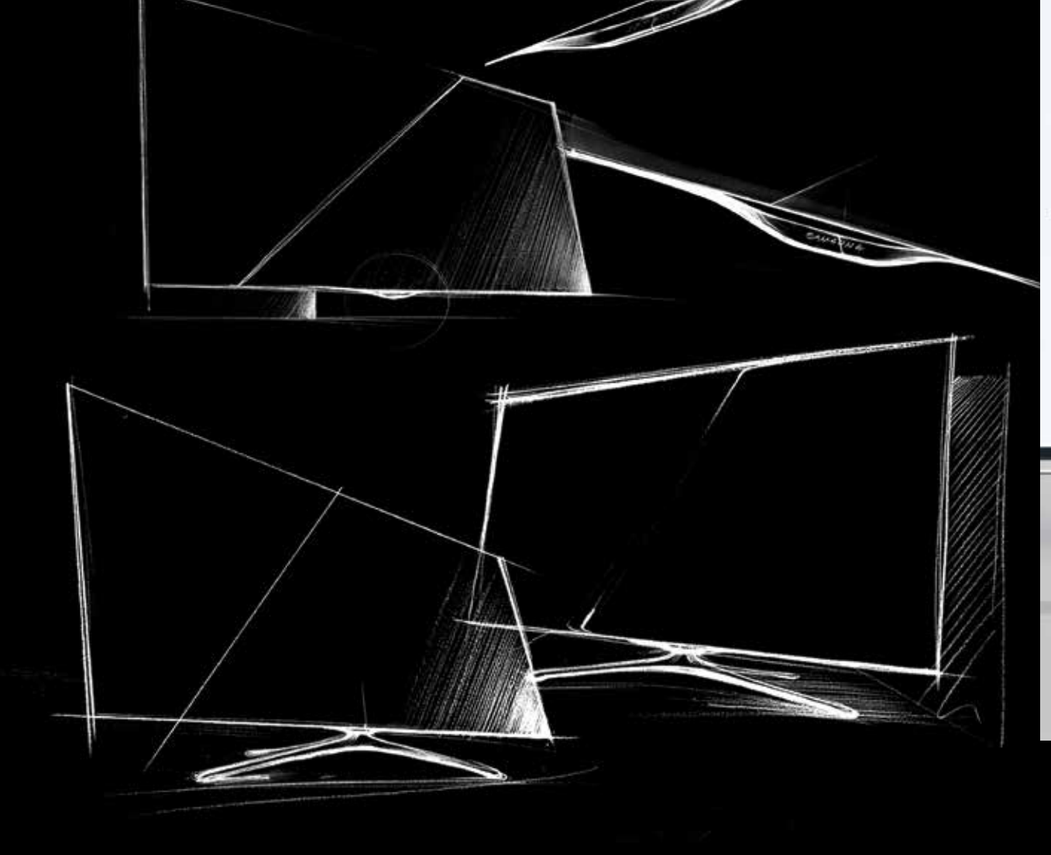
7/ WEB BROWSER

Visit your favourite sites and display all the web content you love on the big screen.

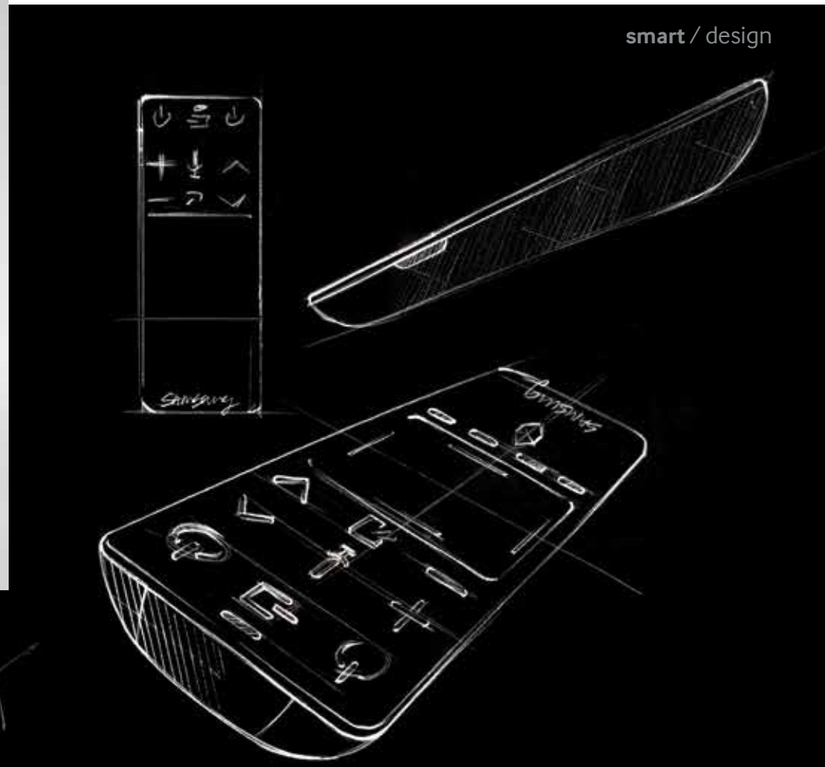
8/ SKYPE® [12]

For Samsung Smart TVs with a built-in camera, or for models supporting an optional camera accessory, video-call your friends and relatives around the world for free!

Not all features are available on all Samsung products. Certain disclaimers and restrictions apply. Please see page 82 for further explanatory materials, disclaimers and restrictions.



Referencing nature, the Branch stand design of the LED F6800.



BEAUTIFUL BY DESIGN

Samsung's 2013 collection marks a new visual and tactile evolution, and a new philosophy of design. From televisions that seem to float in the air to audio components that reward the sense of touch as much as sight, the 2013 range will excite and inspire through design, even as it delivers versatility through features and technology.

It begins with the 2013 television collection, which showcases the natural turn and reach of a winter branch in the stand of the LED[15] F6800, and the pure form of mathematical fluidity in the Arc and Metal Flow stands of the F8000 LED and F8500 plasma respectively. And like a true vision of nature, the bezel of each TV seems to melt away, leaving vibrant images hanging, as if in space.

This simplicity is carried through to the new Smart Touch Remote (available on LED F6400 Series and above, and plasma F8500), which uses the same premium metals to complement each TV, but in a straightforward and clear layout to maximise usability.

The LED F8000, with fluid Arc stand.

The philosophy is continued in the new home theatre systems, which take cues from modern architecture to incorporate amazing functionality in elegant, simple design. From overall clean lines, small details stand out, such as the swivelling tweeter speakers of the HT-F9750W, which not only enhance the elegance of the speaker tower, but project sound precisely to the seated listening position.

So too does attention to detail define the new HW-F751 soundbar, which rewards not only sight and sound, but also touch thanks to its combination of clean brushed aluminium details and premium metal speaker grille. With a classic, minimalist design that evokes a more sophisticated age, the soundbar complements not only a modern, technological lifestyle, but also the timeless elegance of days past.

Samsung Smart Touch Remote, with premium metal materials.

PLAY VIDEO

Shared connections

Play photo memories, music and video favourites to big screens and small, with AllShare (Content Sharing)[8].

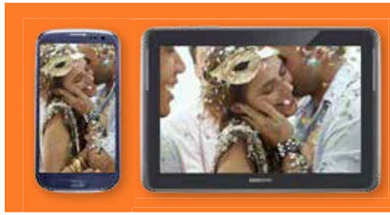
Thanks to Samsung's AllShare (Content Sharing)[8], you can have access to favourite music, videos and photos wherever you are. Whether it's live TV, a recorded movie streamed from a Samsung Blu-ray/HDD recorder , or music from a networked hard drive or stored in the cloud[21], AllShare uses wireless technology to deliver your content to you, on compatible big screens and small.

AllShare (Contents Sharing) works with great Samsung mobile devices like the Galaxy S3 smartphone and Galaxy Tab 10.1 tablet, but because it uses the DLNA wireless standard, it also works with a range of other compartible devices on your home Wi-Fi network, including non-Samsung PCs, cameras and music systems.

And it doesn't stop at the front door. With a mobile internet connection, a compatible mobile device like a smartphone or tablet, and a free app, you can access the content you have in the cloud[21]. Pull up that classic family photo at the cafe, or mix up the host's music selection at your next party. And if your camera has an internet connection, you can snap a pic, upload it to the cloud for your family on the other side of world to view on their Samsung Smart TV.

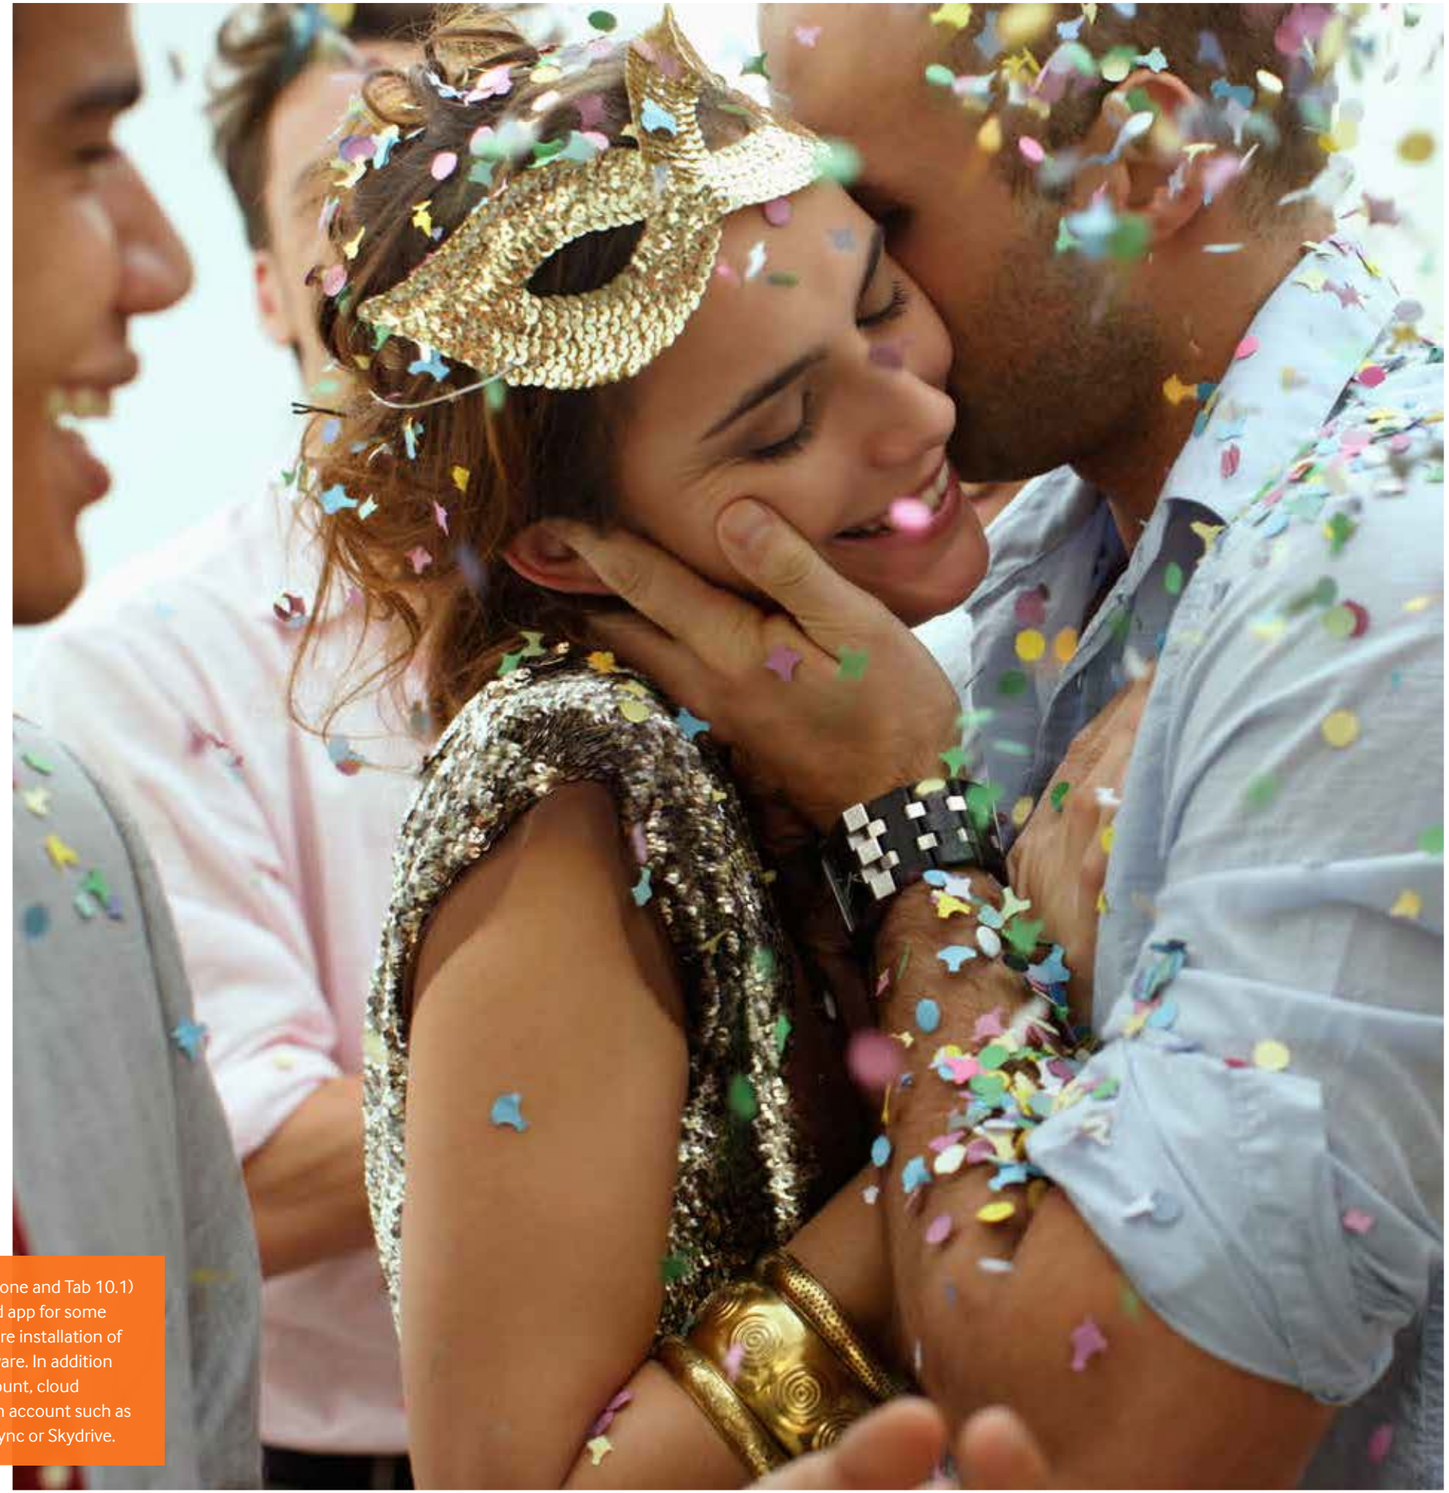
Unwired for fun

Samsung's 2013 range includes wireless networking capability, either via built-in WiFi (F5500 Series LED[15] and above, F8500 and F5500 plasma, HT-E67500W and above in home theatre systems, and Blu-ray players down to BD-F6500), or with an optional USB WiFi adaptor.



Anatomy of AllShare

To use all features, AllShare (Content Sharing)[8] requires a home wireless network and an active internet connection (for cloud[21] features), and a free Samsung account. Compatible mobile devices (such as the Samsung Galaxy S3 smartphone and Tab 10.1) require an installed app for some features. PCs require installation of free AllShare software. In addition to a Samsung account, cloud storage requires an account such as DropBox®, Sugar Sync or Skydrive.



Not all features are available on all Samsung products. Certain disclaimers and restrictions apply. Please see page 82 for further explanatory materials, disclaimers and restrictions.

Share & share alike

How sharing brings out the best in your content.

The convenience of wireless networking, combined with the simplicity of AllShare (Content Sharing) means you can watch or listen to what you want, when you want, and from virtually wherever you are[8]. It's not just about accessing your collection of favourites, it's about freedom and flexibility, and using your TV or home theatre system as an entertainment hub, displaying live TV to one person, streaming music to another, while a third browses the web[20]. Here are some ways AllShare can turn good content experiences into great ones.

Entertainment on tap

With cloud[21] storage, you don't have to worry about storage space on your mobile device. Upload gigabytes of high-quality music, home movies and cherished photos, and then use your compatible device to enjoy your content wherever there's a Wi-Fi or 3G mobile broadband connection, either while you're at home or away.

Snap and share

Upload holiday photos to the cloud and then push them to another compatible device half a world away. Snap a pic of yourself on a foggy, chilly London street and send it to your friend's screen in sunny Sydney.

Smart View

Want to take the program you're watching on the Samsung Smart TV with you as move around the house? Download the Smart View[13] app and use Clone View to stream it to a compatible mobile device, or use Dual View to stream a movie from a connected BD-8900 Blu-ray player to someone else in another room, while you enjoy TV on the big screen.

Don't stop the music

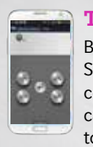
Arrive home with your favourite album playing on your Samsung Galaxy S3 smartphone. Rather than stop the music, use Bluetooth® or AllShare (Content Sharing)[8] to push it to your DA-E750 wireless audio with dock and turn that personal audio into room-shaking rock!

Mirror, mirror

Want to get that photo, video or music clip from the small screen up onto the big screen TV? Just activate AllShare (Mirroring)[9] on a compatible mobile device and make it happen.

Move that movie

Install AllShare (Content Sharing)[8] software on the PC in the home office to stream a movie stored on the hard drive to an HT-F9750W home theatre system in the living room, then sit back and enjoy big surround sound and a great picture on an F8000 LED[15] Smart TV.



TV controller

By installing the free Smart View[13] app, your compatible mobile device can become a powerful touch-enabled remote for your TV. Change channel, adjust volume, even access apps from the Smart Hub[6] and input text via an onscreen touch keyboard.

Photo slideshow

A new take on a classic slideshow: with a DLNA-compatible digital camera or even your compatible smartphone, push images up on to the big TV in the living room, and browse photos without needing to download a single file[9].

Not all features are available on all Samsung products. Certain disclaimers and restrictions apply. Please see page 82 for further explanatory materials, disclaimers and restrictions.

All together now

Stream with Bluetooth® and make physical connections – there are lots of ways to join the Samsung Smart TV party[23].

AllShare (Content Sharing)[8] is a great way to spread content wirelessly, but there are wireless connections you can make between compatible devices that don't need the internet at all.

Bluetooth® lets you pair compatible devices with select Samsung Smart TVs, home theatre systems and Blu-ray players, for quick and easy audio streaming from compatible PCs, notebooks and smartphones[23]. With SoundShare[16], you can even beam full surround audio between a Samsung Smart TV (LED[15] Series 6400 and above, and plasma Series F8500 and F5500) and a soundbar.

For exceptional quality, connect your Samsung Smart TV to a Blu-ray recorder or home theatre system via HDMI[10] – a single cable carries full HD video and audio, even in 3D!

Another simple plug-and-play upgrade is to connect a USB thumb drive or hard drive. You can play photos, videos and music straight from the storage device[11], or take advantage of the USB PVR function on select models (LED Series F5500 and above and plasma Series F8500 and F5500) to record live TV direct to an attached hard drive.

SHARING SOUND

Samsung's SoundShare[16] technology, as well as the universal Bluetooth® standard, give you wireless connectivity for audio devices without the need for a home wireless network. You can pair a compatible soundbar with your Samsung Smart TV and get amazing room-filling sound from a single, slim cabinet.

What if you could have surround sound without being surrounded by a room full of speakers? What if style and power could be melded into a single, elegant device?

tubular temptation

The soundbar concept provides the power and immersion of a surround sound system without the complexity of multiple speakers, or the awkwardness of speaker placement. What's more, amazing SoundShare[16] technology allows you to stream TV and movie soundtracks wirelessly to the HW-F751 from a compatible Samsung Smart TV. Even the down-firing subwoofer is wireless, making it easy to locate just about anywhere in your room.

Existing televisions are, of course, catered for by a wired connection, but with no cables between a compatible TV and the HW-F751, wall mounting can finally look as chic as it does in the catalogues. And best of all, Samsung's HD coding helps ensure there is no audio lag between the onscreen action and what you hear, so that you enjoy a seamless at-home cinema experience.

Key to this is built-in vacuum tube technology, which provides warm, natural sound by taking inspiration from classic audio, while at the same time using digital Crystal Amplifier Pro technology for powerful volume levels, clarity and intensity.

The result is a sound system with a large audio footprint, but a discreet visual presence. Yet the HW-F751's Premium Aluminium design – including the striking exposed vacuum tubes – ensures it will be as much a conversation piece as the core of your home audio experience.

Linear design

With its Premium Aliminium finish, the HW-F751 blends effortlessly with Samsung Series 8 and 7 Smart LED[15] and plasma TVs, its wireless design helping to ensure that nothing breaks those straight, pure lines. On the inside, a built-in accelerometer automatically adjusts the orientation of the LED display to suit its location, whether that's on a wall or atop a cabinet. And exposed via a discrete window (that also neatly incorporates touch controls), the glowing vacuum tubes provide a visual cue that evokes the warmth and quality of its incredible sound.

HW-F751

: straight, pure lines

Not all features are available on all Samsung products. Certain disclaimers and restrictions apply. Please see page 32 for further explanation of features or claims and limitations.

IMAGE SUPREME

LED[15] TVs are the ultimate combination of style, intelligence, and amazing image quality.

PLAY VIDEO

Powerful features and amazing new control methods can round-out a great TV, but what makes a TV great in the first place is excellent picture quality. Samsung LED[15] Smart TVs are designed with image quality front-of-mind, and constantly monitor and adjust the image to deliver bright, sharp, and superbly detailed images, with natural fluid motion that brings you further into the onscreen action.

Samsung LED TVs are so-called because they light the image using tiny light emitting diodes, or LEDs. Samsung arranges the LEDs around the edges of its televisions in an 'edge-lit' configuration that allows the TV designers to make a thin, light chassis. And hat helps your TV blend in with your decor – like an elegant picture frame.

SHARP, DETAILED BRILIANCE

Samsung's next-generation image quality algorithms powered by dual core or quad core processors on select models[22] continually adjust and refine image settings with Micro Dimming to produce vivid images and deep contrast, enhancing shadows and highlights for a more accurate picture. Micro Dimming is available on F8000, F7100, F6800, F6700 and F6400 Series LED[15] TVs.

Not all features are available on all Samsung products. Certain disclaimers and restrictions apply. Please see page 82 for further explanatory materials, disclaimers and restrictions.

+ ENTERTAINMENT WITH DEPTH

Samsung LED[15] Smart TVs from the F6400 Series and above are equipped with a next-generation 3D engine, capable of creating engaging 3D[18] images that seem to pop right out of the screen.

What's more, 3D TVs can convert 2D content into 3D. Match your new 3D TV with Samsung's BD-6500 Blu-ray player and enjoy 3D Blu-ray content in amazing 1080p full HD.

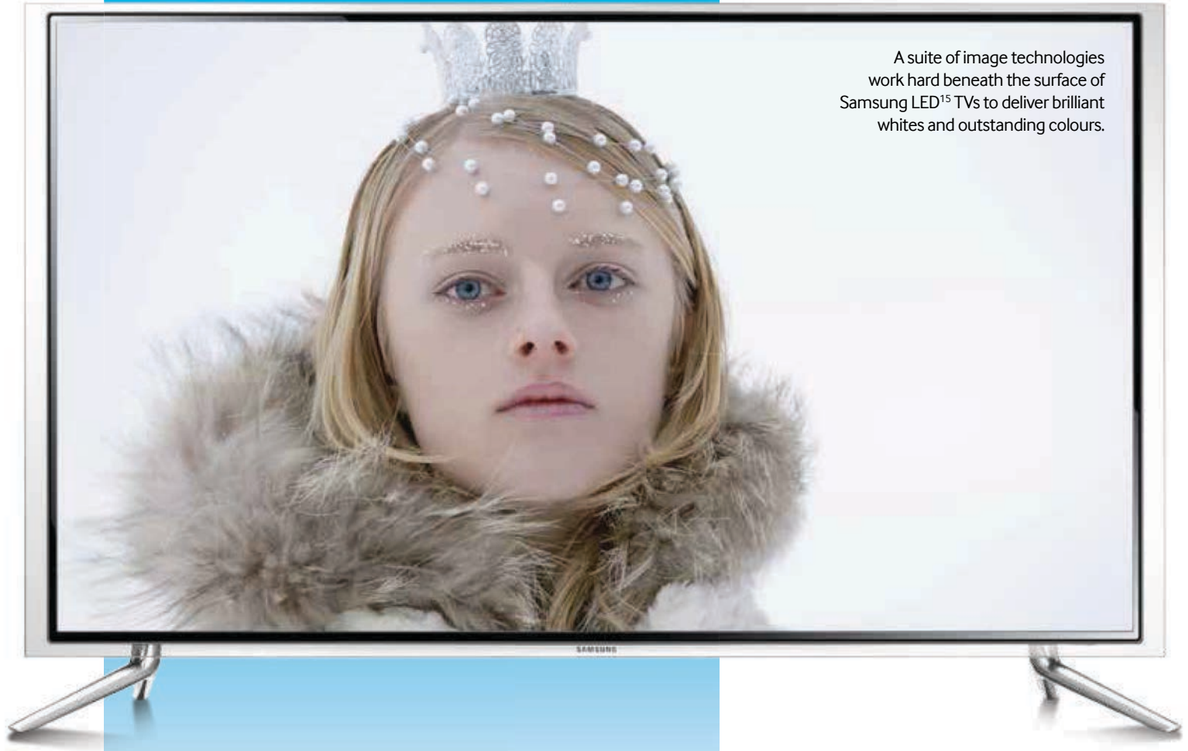
Watched your whole library? Then use your TV's Smart Hub[6] and Explore 3D app to find even more amazing 3D content.

All Samsung 3D TVs come with two pairs of active shutter glasses for watching in 3D, but when you need to cater for more than just two people, the SSG-3570CR glasses (sold separately) are comfortable enough to wear for a whole evening, and run for up to 40 hours on a single charge.

> Micro Dimming helps to maximise the contrast in every image and reveal the detail you were meant to see

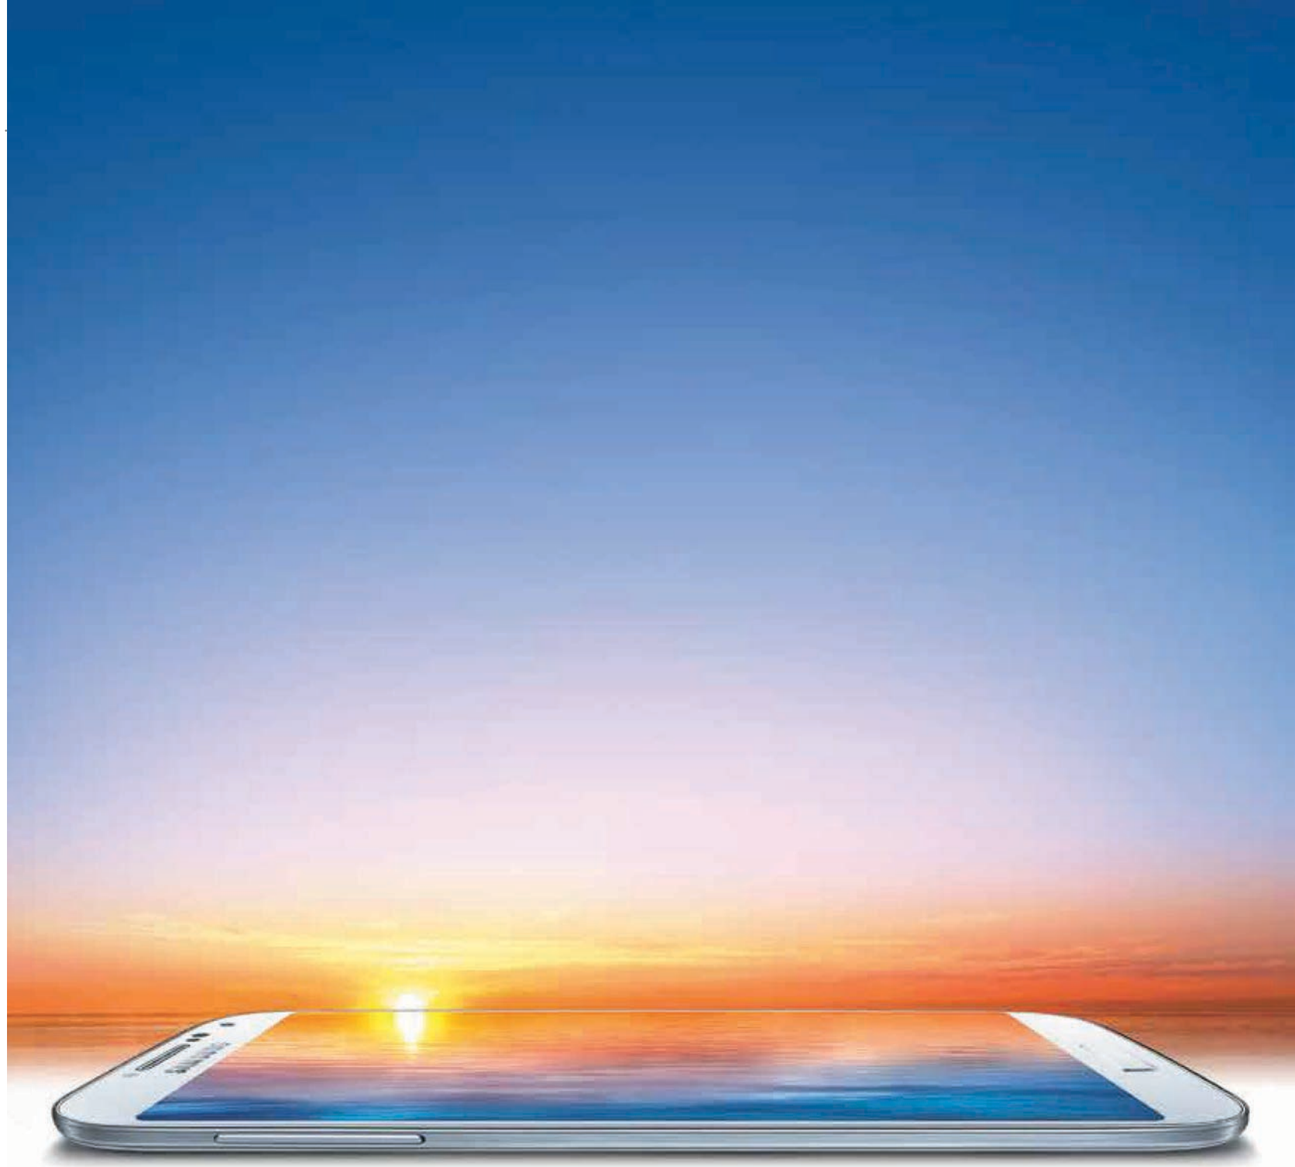
What's more, to create deeper blacks and cleaner whites, your Samsung Smart TV employs quad core (F8000 Series) or dual core processors (F6400-F7100 Series) in concert with Micro Dimming on select models[24] to adjust the backlights and help avoid muddy-brown or dark-grey shadows that can limit detail in a scene.

Micro Dimming works constantly and is able to respond almost instantly to the changing brightness levels in a moving image on the screen, applying the necessary adjustments across multiple areas of the screen at once – up to 576 zones with Micro Dimming Ultimate on the F8000 Series – to help maximise the contrast in every image and reveal the detail you were meant to see.



A suite of image technologies work hard beneath the surface of Samsung LED[15] TVs to deliver brilliant whites and outstanding colours.

Not all features are available on all Samsung products. Certain disclaimers and restrictions apply. Please see page 80 for further explanatory materials, disclaimers and restrictions.



Live in a world of infinite possibilities.

Samsung GALAXY S4 | Life companion

SAMSUNG

BIG PICTURE PLEASURE

When it comes to huge-screen home cinema experiences, plasma gives you the size you need, with the image quality you deserve.

When massive size, deep blacks, rich colours, and a demand for unparalleled image quality are paramount, a Samsung plasma TV is ideal. Plasma TVs are just as sleek and stylish as their LED[15] counterparts, and fans of the big screen can enjoy a wide range of sizes all the way up to 64 inches.

Where plasma really excels is in the display of black, and the deeper and truer the black on a TV, the better colours will look next to it. Deep shadows and inky blackness are second nature to a plasma TV, further enhanced by Samsung's Black Optimiser and, on plasma F8500 models, Real Black Pro Panel. This panel displays shadows, highlights and every nuanced detail in between, all as they were meant to be, creating an image that seems to jump out of the frame.

And similar to Samsung's LED television models, plasma models employ a Clear Image Panel which is designed to absorb ambient light and reduce reflections, for less blur, less distraction and even more detail in bright rooms, compared with previous Samsung models.

Love action? Thanks to 600Hz Subfield Motion technology and Cinema Smooth image adjustment, a Samsung plasma TV works to create smooth, natural images, by filling out each frame with additional subframes. Instead of objects appearing to judder as they pan across the screen, they move smoothly, more like you would see them with the naked eye.

When panel size is a priority, but image quality can't be left behind, a Samsung plasma TV – ranging from 51 to 64 inches – can satisfy the most demanding viewer.

+

Looking for the ultimate at-home 3D experience? 3D Sound Plus on Samsung soundbars introduces a vertical dimension to soundtracks from 2D and 3D[18] content, creating audio effects that come from above as well as around you. You can even adjust the depth of the sound to match the depth of the 3D image on the screen. On select home theatre systems (HT-F9750W and HT-F5500) DTS Neo: Fusion deepens the vertical sound experience, providing more immersive effects that seem to come from more points in your viewing room.

Not all features are available on all Samsung products. Certain disclaimers and restrictions apply. Please see page 82 for further explanatory materials, disclaimers and restrictions.

Fashionista design houses a blend of old-school audio warmth and next-generation entertainment intelligence – where the past and future harmonise.

now, hear this

Blending striking design with incredible technology, the HT-F9750W 3D[18] home theatre system can produce some of the clearest, purest sound you're likely to hear, and present images to your Samsung Smart TV that are a pixel-perfect match for its full high definition resolution.

Proven audio excellence meets next-generation technology in the system's old-world vacuum tube pre-amplifier and new-school digital GaN (Gallium Nitride) power amp. The result is warm natural tones, noise reduction and sound resolution, which – combined with advanced Ceramic Polypropylene Injection Diaphragm (CPID) speakers – makes for pure, clear and bright sound.

The tweeters in these amazing CPID speakers swivel to help ensure sound is directed precisely to your sitting position, while wireless rear speakers and the wireless subwoofer allow flexible placement in your viewing room, and reduce the tripping hazard of cables.

For surround, DTS Neo: Fusion heightens the sense of vertical sound in 5.1 and 7.1 channel movie soundtracks, for a more immersive experience and an extra level of sonic realism: it's like 3D for your audio! Best of all, it works with both 2D and 3D video content[18], either from your disc collection or great video on-demand apps[19] like Quickflix™ and PLUS7.

HT-F9750W

: warm, natural tones

High-end elegance

The Premium Aluminium finish on the Series 9 home entertainment system allows it to harmonise with other high-end components, and complement the decor of today's style-focused living spaces. The central unit is a sweet, cosmetic match for Samsung Series 7 and 8 Smart LED[15] and plasma televisions, while the tallboy speakers reflect design cues from their slim, metal bezels.

Not all features are available on all Samsung products. Certain disclaimers and restrictions apply. Please see page 82 for further explanatory materials, disclaimers and restrictions.

SOFA CINEMA

Complete the big-screen home entertainment experience with cinema-scale surround sound.

Great home cinema deserves to be experienced by your two most important senses: sight *and* sound. For the living room and the big TV, a Samsung home theatre system brings amazing surround sound into your life. You can choose 5.1 or 7.1 channels with eye-catching tallboy speakers or discreet satellite units, and on select models, the rear speakers connect wirelessly for added convenience.

On the flagship HT-F9750W, speakers employ new CPID construction materials to help deliver excellent detail and accuracy across the sound spectrum, with tweeters mounted on a swivel mechanism so that sound can be angled precisely at the listening position. Plus, this flagship system and the HT-F5500 come with Dolby DTS: Neo Fusion for audio effects that appear to come from above, as well from the sides and back of the room, creating a soundscape that's a thrill to get lost in. ▶

Smart systems

With Smart Hub[6] on board, the HT-9750W, HT-E6750W and HT-F5500 home theatre systems, and the BD-F8900, BD-F8500 and BD-F6500 Blu-ray players can bring apps[19], web browsing and great AllShare (Content Sharing)[8] features to an existing TV, whether that's in your living room, a bedroom or study.

Not all features are available on all Samsung products. Certain disclaimers and restrictions apply. Please see page 82 for further explanatory materials, disclaimers and restrictions.

"The latest digital GaN amp technology meets old school vacuum tubes for great sound that not only goes loud, but does so with nuance and warmth"

Just want great, clean music in a compact but powerful package? The DA-E751 wireless audio with dock combines great looks with a vacuum-tube pre-amp and glass fibre speakers to bring warmth to your whole digital collection. Plus with AllShare[17] (without cloud storage), Airplay and Bluetooth®, [23], you can free the tunes within compatible smartphones, tablets and PCs to enjoy untethered listening, whether you're in the living room, or out on the deck.

DA-E751

The DA-E751 loves your compatible Galaxy smartphone and your compatible iOS device, with dual docking to charge one while playing music from another[25].

Of course, power is important for generating the volume levels we love in surround sound, and the latest digital GaN amp technology meets old school vacuum tubes in the HT-F9750W, for great sound that not only goes loud, but does so with nuance and warmth.

Of course, Samsung home theatre systems and Blu-ray players will play your DVD, Blu-ray and 3D[18] Blu-ray collections, as well as media from USB devices[11], but select models (HT-F5500 and above, and BD-F6500 and above) come with great Smart Hub[6] features too.

It's a quick and easy way to upgrade any TV, providing access to scores of apps[19], including BigPond and Quickflix™ movies on-demand, catch-up TV from iview, PLUS7 and SBS On Demand, and music from Samsung Music Hub. You can browse the web, keep in touch with your social network, and from the Photos, Videos & Music Panel, play content from your AllShare compatible devices to a connected television[8,9].

Raising the bar

For small living rooms, or where rear speakers aren't the right choice, a soundbar can create the effect of a room full of speakers while only taking up a small space under the TV. Convenient SoundShare[16] technology allows movie and TV soundtracks to stream wirelessly from compatible Samsung Smart TVs, and with integrated vacuum-tube pre-amplifier technology, audio is just as warm and inviting as on a multi-speaker system.

Grow your content

Inside a BD-F8900 or BD-8500 Blu-ray/HDD player, a powerful dual core processor, twin TV tuners, and either 500GB (BD-8500) or 1TB (BD-F8900) of storage space give you lots of recording and viewing options: Record up to two channels, and watch a Blu-ray disc or use Smart Hub[6] apps at the same time. Or while someone else uses the TV, stream recorded content to a compatible mobile device using the handy Smart View feature[13].

Not all features are available on all Samsung products. Certain disclaimers and restrictions apply. Please see page 82 for further explanatory materials, disclaimers and restrictions.

This year's flagship home theatre system from Samsung also sports a vacuum tube in the pre-amp stage, along with an amplifier that uses Gallium Nitride to make its 1330 watts just that much more awesome.

WHICH SAMSUNG SMART TV ARE YOU?

ART MEETS TECHNOLOGY

exquisite balance between aesthetics and functionality

01

02

03

For the most demanding enthusiast who requires a blend of high technical performance with cutting-edge design, these premium products represent the pinnacle of Samsung's innovative inspiration. From the clean lines of the unique Arc TV stand to the luxe finish of the swivel speakers in the complementary home theatre system, these devices will seamlessly meld with the most particular decor, yet at the same time deliver incredible technical performance.
A meeting of the worlds: boutique design and cutting-edge technology.

01 F8000 LED[15] TV

With a quad core processor, Micro Dimming Ultimate technology for intense image quality and brightness, S Recommendation[1] with Voice Interaction[3] for finding more of the TV shows you like, plus Voice and Motion Control[5] and great Smart Hub[6] content, the F8000 LED TV, with its unique Arc stand, is the pinnacle of Samsung television technology.

02 HT-F9750W HOME THEATRE SYSTEM

Designed to perfectly complement the F8000 LED TV, this high-end surround system combines the warmth of valve amplification with next-generation GaN circuitry and unique swivel tweeters to create a system that delivers amazing power and performance from an unexpectedly elegant and understated aesthetic.

03 DA-E750 WIRELESS AUDIO WITH DOCK

For chilling out at home, the retro-inspired DA-E750 brings elegance to stereo listening. Whether you take advantage of AllShare (without cloud storage)[17] to stream playlists over a home network, dock a Galaxy S3 and a compatible iOS device at the same time, or connect via Bluetooth® to compatible smartphones, the DA-E750's vacuum tube amplifier and glass fibre speaker combination caresses the senses with rich, warm, detailed sound.

Not all features are available on all Samsung products. Certain disclaimers and restrictions apply. Please see page 82 for further explanatory materials, disclaimers and restrictions.

WHICH SAMSUNG SMART TV ARE YOU?

pure performance

intelligent design marries with paramount performance

01

02

03

For the audiophile or videophile who demands cutting-edge performance and the latest innovations in entertainment technology, these products deliver beyond expectations. From a TV that learns your viewing habits to serve up content you want, to a home theatre system that can connect wirelessly to your home broadband for amazing functionality, to a Blu-ray recorder with a massive 1TB of storage for the ultimate home movie collection, when performance and intelligence is the primary motivator, this is the setup that delivers.

01 BD-F8900 BLU-RAY/HDD RECORDER

For outstanding freedom and flexibility, a Blu-ray/HDD recorder gives you the option to both play back Blu-ray discs in stunning full HD, and record TV to an internal one terabyte hard drive, creating a storehouse of content. Twin tuners allow you to record two channels at once, or download the Smart View[13] app to watch one TV channel in the lounge room while streaming a Blu-ray movie to a Samsung Tab 10.1 or Galaxy S3 smartphone in another.

02 F7100 LED[15] TV

Micro Dimming Pro and an Ultra Clear Panel combine to deliver crisp, vivid images, with outstanding contrast. The Smart Hub[6] serves up apps[19], the web, social media and your personal media collection via AllShare (Content Sharing)[8], while S Recommendation[1] learns your viewing preferences and suggests new TV content, which you can control with simple voice commands[3] and hand gestures[5].

03 HT-F5500 HOME THEATRE SYSTEM

The easy-to-place satellites and 1000 watt total power output of this 3D[18] system are underpinned by a dual core processor, which means web pages and apps[19] load quickly from the Smart Hub[6]. AllShare (Content Sharing)[8] lets you play music, photos and videos from DLNA compatible devices to any connected TV, and you can use the same devices to access favourite content saved to Dropbox®, [21] from virtually anywhere in the world.

Not all features are available on all Samsung products. Certain disclaimers and restrictions apply. Please see page 82 for further explanatory materials, disclaimers and restrictions.

WHICH SAMSUNG SMART TV ARE YOU?

EVERYDAY EXCELLENCE

essential, steady, reliable… but never ordinary

When you need smart, high quality equipment that doesn't interfere with your busy lifestyle, this trio ticks all the boxes and provides incredible value and features, without the fuss. A plasma TV gives you massive screen size without the hip pocket hit, and it mates perfectly with a soundbar that does big surround without the complexity of setting up multiple speakers. Add a Blu-ray player and you're all set for entertainment, whether it's from DVD or Blu-ray disc, the Smart Hub[6] or your networked media.

F8500 PLASMA TV

Get a top-end Samsung Smart TV with quad core processor, Voice[3] and Motion Control[5], and so much more. With deep blacks and vivid colours, the F8500 offers visual brilliance for 2D and 3D[18] content, backed up by Samsung's Smart Hub[6] interface. Share content, get new content via S Recommendation[1], connect wirelessly to other compatible devices... have it all!

BD-F6500 BLU-RAY PLAYER

The amazing visual clarity of the Blu-ray format wrapped in a glossy black jacket, the BD-F6500 plays your favourites from disc, the Smart Hub[6], connected USB devices[11] or your wireless network to any TV you connect it to. Enjoy great video on-demand apps[19], or use SoundShare[16] to stream music from Samsung's Music Hub app via a compatible Samsung Smart TV to the HW-F751 soundbar.

HW-F751 SOUNDBAR

Your lifestyle demands simplicity. The HW-F751 soundbar gives you the performance you want, without the need to sacrifice space or your perfect furniture layout. Hang it or place it beneath the TV and it practically disappears – giving big, immersive surround sound from an astonishingly compact package.

Not all features are available on all Samsung products. Certain disclaimers and restrictions apply. Please see page 82 for further explanatory materials, disclaimers and restrictions.

TIMELESS

As much a work of art as cutting-edge technology, Samsung goes beyond expectations with Ultra High Definition television.

With a focus on absolute image quality and definition, the Samsung S9 UHD TV represents the next step in television technology, employing an astonishing 85 inch Ultra High Definition panel capable of displaying an image with more detail and brilliance than conventional Samsung televisions.

Today's Full HD television screens use around two million pixels to produce a picture, but with 4K (or UHD) resolution, the S9 is the equivalent of four Full HD displays merged into one.

With more than eight million pixels across its screen, the S9 is capable of displaying pictures with up to four times more detail than Full HD televisions, producing a visual experience with incredible realism.

Backing this amazing panel is a quad core processor, powering Micro Dimming Ultimate technology, which constantly monitors the image and adjusts contrast, working hard to bring out every last nuance of detail.

The S9 is wrapped in Samsung's boldest and most innovate design. The Timeless Gallery stand suspends the TV, as if floating, in a frame that's elegant, striking but never overpowering, so this TV looks just as good switched off as when it's in use.

Naturally the S9 has all the Samsung Smart TV features you've come to expect, including Smart Hub[6] with S Recommendation[1] and Voice Interaction[3] for simple and intuitive control. And to make the most of the Ultra High Definition panel, the S9 can upscale today's full high definition TV and Blu-ray content to near-4K standard, as well as play native 4K content as it becomes available.

BIG SCREENS, BIG SPORTS

Show your support and cheer on your team, while feeling like you're right there in the stadium for every game.

Samsung shares your passion for world-class sport, and brings the stadium right into your living room through its big screen televisions.

When it comes to TV, bigger should be better. A bigger display pulls you into the action, it fills your living room with colour and movement. Watching a movie on a big screen makes for a great night in. Watching your team win on a plus-size 75 inch screen makes for lifelong memories.

As a world sponsor of the Olympics and chief sponsor of the Chelsea Football Club, Samsung knows sport, and is supporting the Wallabies in their 2013 season. Catch every match in high definition on Channel Ten or on Fox Sports via the Foxtel on Internet TV[14] app, and when the Wallabies aren't playing, you can go beyond the game with apps[19] for a whole range of sports.

So sit back for the ultimate in Samsung entertainment. Sport, movies, whatever: a big-screen TV has you sorted.

Live large

Samsung LED[15] televisions stretch to an incredible 75 inches on the F8000 and F6400 Series, with 65 and 60 inches models also available, and 60 and 55 inch models found in the F7100 Series. In plasma, models start at 51 inches and go up to 64 inches with the F5500 and F8500 Series. Pair these big screens with a home theatre system for surround sound processing that creates an authentic stadium ambience.

Not all features are available on all Samsung products. Certain disclaimers and restrictions apply. Please see page 82 for further explanatory materials, disclaimers and restrictions.

Samsung Smart TV

Your comprehensive guide to the key Smart features, picture and sound technologies available in Samsung televisions, home theatre and music systems, and an overview of the models that support them.

Smart, beautiful, fun

The Samsung LED[15] TV range: amazing image quality with ultra-powerful smart technology. Next-generation Smart Hub[6] features take television to the next level, with apps[19], web browsing and social networking, while quad core (F8000), and dual core (LED 5500 and above) processors combine with Micro Dimming[22] technology for accurate and immersive pictures.

SHARP, DETAILED BRILLIANCE

Next-generation image quality algorithms powered by dual core or quad core processors continually adjust and refine backlight settings with **Micro Dimming Ultimate** or **Micro Dimming Pro** on select[22] models to produce vivid images and deep contrast.

A NEW VIEW

The **Smart Hub**[6] interface presents apps and web pages, and shares content with your compatible mobile device through a new multi-panel interface designed to make it easy to find the content you want. Search and choose your perfect selection via **Voice Interaction**[3], use **Voice Control** or **Motion Control**[5], or Samsung's elegant conventional remote.

NATURALLY SPEAKING

Voice Interaction[3] lets you control and search Samsung Smart TV using simple, natural phrases. Just ask: "Is there anything good on?" and Samsung Smart TV can show a selection of free-to-air TV content suggested by the S Recommendation[1] system.

KNOW YOUR MIND

S Recommendation[1] is the incredible personal content assistant that analyses what you watch, and suggests new content based on your viewing preferences. Let your TV do the channel surfing for you! Available on all 2013 Samsung Smart TVs.

EYE ON THE ACTION

On the F8000 Series, a retractable **built-in camera** (accessory camera available for other models, sold separately) automatically tucks away when not needed. When active, the camera recognises gestures for **Motion Control**[5], remembers individual content preferences with **Face Recognition**[4], and enables video calling via the **Skype**® [12] app.

ENTERTAINMENT ON THE GO

With **AllShare (Content Sharing)**[8], a Samsung Smart TV becomes the meeting place for content stored across compatible devices on your home network, while content stored in the cloud can be enjoyed on compatible mobile devices wherever there's a Wi-Fi or 3G connection.

THAT'S SMART

Download the **Smart View**[13] app to stream a TV channel to a compatible mobile device while a Blu-ray movie plays on the big screen (Dual View), or use Clone View to play the same TV show to both screens at once, and not miss moment.

LOVES YOUR GALAXY

Take your Samsung Galaxy S3 smartphone or Samsung Galaxy Tab 10.1 tablet in hand and use **AllShare (Mirroring)**[9] to put mobile content up onto the TV. Your device can even function as a remote for your TV[13].

BEAUTY MATCHES BRILLIANCE

Cutting-edge design introduces new visual concepts like the sweeping **Arc** stand (F8000), the nature-inspired **Branch** stand (F6800), and the elegant **Flow** with its innovative 'twisted' logo concept (F7100).

WIRELESS SHARING

Wireless LAN built-in makes it easy to join a home broadband network, and quick to start surfing web pages, streaming video on-demand, and sharing personal content files with compatible mobile devices[20].

A CLEAR VIEW

To reduce ambient reflections, **Ultra Clear Panel** technology in F8000 and F7100 Series LED[15] TVs uses a unique panel structure to help absorb external light. See your content, not your lamps or windows!

UNWIRED FOR SOUND

Stream TV audio, music and movie soundtracks to a Samsung Soundbar using **SoundShare**[16], and enjoy simple fuss-free surround setup.

SURF'S UP

Hit up your favourite sites, do a little shopping, even pay the bills via internet banking. All possible with the **web browser** app[19] built into Samsung Smart TV models.

Not all features are available on all Samsung products. Certain disclaimers and restrictions apply. Please see page 82 for further explanatory materials, disclaimers and restrictions.

Big is beautiful

Big picture, amazing quality, that's the plasma difference. For when size does matter, choose from displays as big as 64 inches, and experience image quality that really pops. Deep blacks are thanks to Real Black Pro (F8500), while a powerful quad or dual core (F5500) and 600Hz Subfield Motion combine to create an image that's fluid and lifelike, wrapped in an elegant new design.

POWER TO BURN
Load content, run apps[19], and browse the web quickly[20], with next-generation **quad core** (F8500) or **dual core processors** (F5500).

LIGHT AND SHADE
See almost every nuance of detail, with deeper blacks and exceptional brightness for colours that really pop, on Samsung's unique **Real Black Pro Panel** (F8500).

LIQUID MOTION
Follow even the fastest play in your favourite sport, and feel drawn further into the intense action of a high-octane blockbuster with **600Hz Subfield Motion**.

CRYSTAL CLEAR
Reflections on the TV from ambient light are distracting. Samsung's **Clear Image Panel** is designed to absorb ambient light and minimise reflections, letting you focus on your content.

SMOOTH OPERATOR
Cinema Smooth processing helps reduce blurring and loss of detail in moving images.

CORE CONTROL
Connect using HDMI[10] and take command of compatible Samsung devices through a single remote, with the powerful and convenient **Anynet+** system.

A SECOND VIEW
With **Smart View**[13] **Dual View** (available on F8500), use your compatible mobile device to watch one channel while the TV shows another, or push photos and video from your mobile to the TV with Clone View (available on F8500 and F5500).

SPEAK EASY
With **Voice Interaction**[3] (F8500), use simple, natural spoken language to control your TV, search the web[20], launch apps[19] and get new content[1]. It's so easy!

THINKING OF YOU
Let your TV do the channel-surfing for you, and get suggestions for great new TV content based on your viewing preferences, thanks to **S Recommendation**[1] (available on F8500 and F5500).

STRIKING SIMPLICITY
Samsung's 2013 plasma TVs look as good off as they do on, with **minimalist designs** that put the focus on the image and help your content float before your eyes. With **ultra-thin bezels** and premium materials, these TVs draw you in, and add style to your entertainment space.

FEEL MOVED
Control your TV with a wave of the hand using the built-in camera (F8500) or camera accessory (sold separately for F5500) and **Motion Control**[5]. Navigate the **Smart Hub**[6], download new apps, and even use **Skype**®[12] for video calls to friends and family.

SHARE AND SHARE ALIKE
With **AllShare (Content Sharing)**[8] (available on F8500 and F5500 models), your plasma TV becomes a digital hub you can use to share content to compatible devices in your home – or even around the world, thanks to cloud[21] connectivity.

A NEW PLAYGROUND
The **Smart Hub** interface simplifies interaction with four main panels: On TV, Apps, Photos Video & Music, and Social. All your content, friends, apps and more, right in front of your eyes.

Not all features are available on all Samsung products. Certain disclaimers and restrictions apply. Please see page 82 for further explanatory materials, disclaimers and restrictions.

Enjoy the difference

Amazing warmth and quality of sound with hybrid vacuum tube and digital amplifier technology. Immersive surround from satellite or tallboy speakers. Exceptional picture quality, plus great Smart Hub[6] features and wireless sharing around the home and in the cloud[21]. Samsung home entertainment systems fit your life.

WARM INNER GLOW
With a classic **vacuum tube** pre-amp stage, select home theatre systems, soundbars and the DA-E750 wireless audio with dock produce audio with exceptional warmth and presence.

MATERIAL WORLD
Ceramic Polypropylene Injection Diaphragm (CPID) speakers create amazingly taught and detailed sound, bringing outstanding audio performance into the future (HT-F9750W home theatre system).

FREQUENCY RESPONSE
Available in the HT-F9750W home theatre system, Samsung's new **GaN power amp** takes noise reduction and audio resolution to the next level, for sound that's powerful and nuanced.

SMART AND POWERFUL
Smart Hub[6] on home theatre systems (HT-F5500 and up) and Blu-ray players (BD-F6500 and above) means amazing apps[19], video on-demand video, catch-up TV and networked media on any connected TV.

CRYSTAL CLEAR
Enjoy pure digital audio playback and protect your your speakers from sudden peaks in volume, with **Crystal Amplifier Plus**.

WIDE AND HIGH
3D isn't just for your eyes – it's for your ears too. With **DTS Neo: Fusion** or **3D Sound Plus**, your home theatre system or soundbar can create a wall of sound for greater immersion and excitement.

NO STRINGS ATTACHED
Enable Smart functionality and content sharing with **built-in wireless** networking on select Blu-ray, home theatre and audio devices[26], or Wi-Fi convenience with an optional **LAN adaptor**[20].

FOR THE RECORD
Take control of your favourite TV content with scheduled recording on the BD-8900 and BD-8500 Blu-ray/HDD recorders. **Dual tuners** allow you to record two programs[17], while **1TB or 500GB capacities** let you build a huge collection[17].

OVER THE AIR
Forget physical connections, with wireless audio streaming you have plenty of options for spreading the sound. From wireless surround with **SoundShare**[16] on soundbar models, to **AllShare**[8] on compatible devices, and **Bluetooth®** stereo and **Airplay** from iOS devices, you'll be spoit for choice.

CLASSIC LINES
With a focus on high-grade metals, Samsung's 2013 audio range is as stylish as it is powerful. Choose from slim and elegant tallboy speakers or unobtrusive satellites in home theatre, and enjoy the minimalist, uncluttered look of the new soundbars.

INCREDIBLE DETAIL
See images like you've never experienced before from Samsung with **4K Upscaling** (HT-F9750W). Able to make 1080p Full HD video appear with up to 4x its native resolution, it's next-generation entertainment today, and means you're ready for a new age of ultra-high definition TV.

SHARE AND SHARE ALIKE
AllShare (Content Sharing)[8] lets you share content across compatible devices in your home network – wirelessly play music from a compatible PC to a home theatre system or stream photos from a compatible smartphone to your Blu-ray player. Store media collections in the cloud and play them back to compatible mobile devices wherever you are!

KEEP IT TIDY
Eliminate cable clutter with **wireless rear speakers** on select home theatre systems, or enjoy wireless audio streaming between **SoundShare**-equipped Samsung Smart TVs and any 2013 Samsung soundbar.

Not all features are available on all Samsung products. Certain disclaimers and restrictions apply. Please see page 82 for further explanatory materials, disclaimers and restrictions.

Disclaimers

1. **S Recommendation:** S Recommendation is available on LED Series F8000, F7100, F6800, F6700, F6400, F6300, F5500 models and Plasma Series F8500 and F5500 models. S Recommendation is not available without expressed consent regarding the collection and use of personal information. S Recommendation requires internet access. Data and subscription charges may apply. Performance may vary depending on the service provider. Service requires RF signal and only works on free-to-air channels.

2. **Smart Interaction:** Performance may vary depending on language spoken and surrounding environment, including, local dialect, pronunciation, voice and ambient noise and lighting. Service requires RF signal and only works on free-to-air channels.

3. **Voice Interaction (Natural Language) or Voice Control (Basic Commands):** Voice Interaction is available on LED Series F8000, F7100, F6800 and F6700 models, and Plasma Series F8500 models. Performance may vary depending on the language spoken, local dialect, pronunciation, voice and surrounding environment, including ambient noise. Internet connection required. Data and subscription charges may apply. Smart Touch Control is required to use Voice Interaction/Control in all TV models.

4. **Face Recognition:** Face Recognition is available on LED Series F8000, F7100, F6800, F6700, F6400, F6300, F5500 models and Plasma Series F8500 and F5500 models. Face Recognition does not provide as high a level of security as logging in with an ID and password. The use of Face Recognition requires camera.

5. **Motion Control:** Motion Control is available on LED Series F8000, F7100, F6800, F6700, F6400, F6300, F5500 models, and Plasma Series F8500 and F5500 models. Performance may vary based on surrounding environment. TV Camera required using Motion Control.

6. **Smart Hub:** Smart Hub is available on LED Series F8000, F7100, F6800, F6700, F6400, F6300, F5500 models; Plasma Series F8500 and F5500 models; Blu-ray Player models BD-F8900, BD-F8500, BD-F6500, and Home Theatre System models HT-F9750W, HT-E6750W and HT-F5500. Certain features within Smart Hub not available without express consent regarding the collection and use of personal information. Some features may require additional peripheral devices which are sold separately. Certain advertised features, applications and services may not be available on all model, devices and regions and are subject to change without notice. Internet connection required. Data and subscription charges may apply. Service requires RF signal and only works on free-to-air channels.

7. **Smart Evolution Kit:** Smart Evolution Kit sold separately. Performance of Smart Evolution Kit may vary depending on year of TV launch, model specifications, application availability and hardware limitations.

8. **AllShare (Content Sharing):** AllShare (Content Sharing) is available with access to cloud storage on LED Series F8000, F7100, F6800, F6700, F6400, F6300, F5500 models; Plasma Series F8500, F5500 models; Blu-ray Player models BD-F8900, BD-F8500, BD-F6500, and Home Theatre System models HT-F9750W, HT-E6750W and HT-F5500. To share content inside the home, other compatible DLNA products must be connected to the home network via Wi-Fi or Ethernet cable. Some products may require DLNA software to be installed. To store content on the cloud, AllShare may require separate registration with the third-party service provider. Internet connection required. Data and subscription charges may apply. Usage is subject to service provider agreements. AllShare app with cloud storage feature is only available on selected Samsung devices. For compatible devices, please visit www.samsung.com/au/tv/disclaimers/smart-tv-disclaimers.pdf. AllShare DLNA enables content sharing without access to cloud storage, and is available on LED Series F5000, F4000; Blu-ray player models BD-F5500 and BD-F5100, and Wireless Audio with Dock DA-E750. Samsung takes copyright seriously. Samsung's features and applications are intended solely for private and domestic use. Any other use may be contrary to the law, including copyright law. Samsung does not authorise any use of its features and applications that infringe copyright or are otherwise contrary to law.

9. **AllShare (Mirroring):** AllShare (Mirroring) is available on LED Series F8000, F7100, F6800, F6700, F6400, F6300, F5500 models, and Plasma Series F8500 and F5500 models. To use AllShare (Mirroring), the compatible device and the Samsung Smart TV must be in close proximity. For compatible devices, please visit www.samsung.com/au/tv/disclaimers/smart-tv-disclaimers.pdf.

10. **HDMI:** HDMI cable is sold separately.

11. **Connect Share Transfer:** Certain types of USB support devices may not be compatible with TV depending on factors such as USB memory size and power supply.

12. **Skype:** Skype requires in built camera or accessory TV camera, sold separately. Skype firmware updates required for face recognition.

13. **Smart View:** Smart View is available on LED Series F8000, F7100, F6800, F6700, F6400, F6300, F5500 models, and Plasma Series F8500 and F5500 models. Smart View application available from Google Play. Internet connection required to download application. Data charges may apply. For details regarding compatibility, please visit www.samsung.com/au/tv/disclaimers/smart-tv-disclaimers.pdf. Certain Smart View functions may require firmware upgrades. Smart View 'Dual View' feature on compatible models allows you to view two difference sources, for instance RF cable and HDMI input. Smart View does not allow two different free-to-air programs to be viewed at once. Compatible mobile device and TV must be on same home Wi-Fi network or using WiFi Direct. Samsung takes copyright seriously. Samsung's features and applications are intended solely for private and domestic use. Any other use may be contrary to the law, including copyright law. Samsung does not authorise any use of its features and applications that infringe copyright or are otherwise contrary to law.

14. **Foxtel Play:** Broadband internet connection with a minimum of 2Mbps required. ISP, data download and subscription charges apply. Some features may require additional peripheral devices which are sold separately.

15. **LED:** Samsung LED TVs utilise LCD screens with LED edge lights.

16. **SoundShare:** Compatible audio devices include 2013 Samsung Wireless Speaker DA-F61, Wireless Audio with Dock DA-E750 and Soundbars.

17. **Copyright:** Samsung takes copyright seriously. Samsung's features and applications are intended solely for private and domestic use. Any other use may be contrary to the law, including copyright law. Samsung does not authorise any use of its features and applications that infringe copyright or are otherwise contrary to law.

18. **3D:** To view in 3D, a 3D TV is required, sold separately. 3D is available on Samsung TV LED Series F8000, F7100, F6800, F6700, F6400 models, and Plasma Series F8500 and F5500 models. 3D glasses required to watch 3D.

19. **Apps:** Applications may need to be downloaded. Internet connection required. Data and subscription charges may apply. Usage may be subject to third party service provider agreements.

20. **Internet:** Internet connection required. Data and subscription charges may apply.

21. **Cloud:** Internet connection required. Data and subscription charges may apply. Usage is subject to cloud provider agreement.

22. **Dual Core/Quad Core Processor:** Quad Core processor is available on LED Series F8000 models and Plasma Series F8500 models. Dual Core Processor is available on LED Series F7100, F6800, F6700, F6400, F6300, F5500 models, and Plasma Series F5500 and F5000 models.

23. **Bluetooth®:** Bluetooth® is available on LED Series F8000, F7100, F6800, F6700, F6400 models; Plasma Series F8500 and F5500 models; Home Theatre System models HT-F9750W, HT-E6750W and HT-F5500; Wireless Audio with Dock DA-E750, and Soundbar models HW-F751, HW-F551 and HW-F450.

24. **Micro Dimming:** Micro Dimming is available on LED Series F6800, F6700 and F6400 models, with Micro Dimming Ultimate available on LED Series F8000, and Micro Dimming Pro available on LED Series F7100.

SAMSUNG

The productivity of a PC.
The freedom of a tablet.
The smart choice for business.

The ATIV smart PC Pro offers the productivity of a Windows® based PC, powered by the 3rd generation Intel® Core™ i5 processor, with the convenience of a tablet that magnetically clips to its base. Plus, the S-Pen can accurately detect the pressure you apply on the screen, and combined with the S-Note software - unique to the ATIV smart PC Pro - makes handwriting-to-digital conversion feel almost as natural and precise as putting pen to paper. The ATIV smart PC Pro - the smart choice for business.
